

Get Survey Responses

When a user answers the survey the response gets posted to the API. To get this data you can either wait for the scheduler to fetch the responses or trigger it manually by clicking

Step-by-step guide

1. Go to the survey you want the responses from
2. Click the arrow next to the "edit"-button and then press "Fetch Responses".
3. The Responses will now be listed in the sub panel, click one to access a question with the answers from the user.
