ADP Marketplace Partner Spotlight

Time Tracker by eBillity

Track time for efficiency and profitability

eBillity's Time Tracker was designed for teams to simplify employee timekeeping for payroll and billing. With customizable settings and flexible add-ons, you can scale as your business grows.

Sync time entries with ADP®.

Employees sync both ways between Time Tracker and ADP. All your employees will be imported into Time Tracker from ADP when you run your first sync, and after that you can create employees in either system. You can sync time entries from Time Tracker to ADP in just a click. Data synced into the ADP payroll cycle includes approved employee time broken down by number of hours worked and regular vs. overtime.

Help save time on administration.

Help reduce time spent on paper timesheets, data entry and chasing employees for their time cards. The time clock kiosk eliminates employee time theft and adds accountability with facial recognition and administrator notifications. The mobile app enables employees in different locations to easily and accurately track time from anywhere — even when they're offline.

Stop "guesstimating" time — it's costing you money.

Help track time efficiently and increase profitability when you capture every minute worked. Pay employees for actual time worked and create comprehensive cost estimates that won't leave you out of pocket.

Know where time goes.

Measure the efficiency of your employees, projects and clients. Detailed reports allow you to view your most productive employees (hours broken down) and easily see operational inefficiencies by identifying trends in the graphically displayed data.

Leverage flexible and customizable time tracking.

Not all businesses are the same and neither are their time-tracking needs. Every Time Tracker account includes a weekly timesheet and the option to track time with timers or time cards. If employees just need to clock in and out at a physical location, there is also the time clock kiosk.

The Value of ADP Marketplace

Get everything you need to manage your people better, from hire to retire. Say goodbye to siloed systems, and hello to powerful HR apps all in one place — connected to your ADP solution.

- Easy and secure
- Seamless integration
