Time tracking for home healthcare

We capture the 6 pillars of time tracking

QuickBooks Time   ![intuit quickbooks]

If your business is being pressured to verify time, location and services performed by your home health and managed healthcare aides, we can help! For a mobile workforce who travel from site to site and perform different tasks for different clients on any given day, accuracy, productivity and visibility are challenges that seem downright impossible to solve. *Until now*. QuickBooks Time, one of the first GPS-enabled mobile timeclock solutions with tens of thousands of clients and millions of users, has everything you need to schedule, manage, track and report on time. QuickBooks Time will automate and streamline your time collection process with the additional benefits of a Who's Working Window, Signature Capture and Job Site photos, plus other solutions to meet all of your time tracking needs.

Tracking the 6 Pillars of Time with QuickBooks

QuickBooks Time can electronically verify these 6 elements of time tracking, making real-time visibility & reporting fast & easy:

1. The location of service delivery
2. The individual provider of the service
3. The individual receiver of the service
4. The date of the service
5. The time the service begins and ends
6. The type of services performed

Award Winning Mobile App

QuickBooks Time's mobile app allows employees to easily select from pre-populated options to track time during client visits, client codes and services performed. Employees can quickly and easily select options from a drop-down menu, enter notes, and even answer attestations such as "I was not injured on the job today" and "I took my temperature, and I do not have a fever." Each punch will capture the time and GPS.

Enhanced Remote Data Capture Solutions

- Job Site photos – alert family if Ms. Jones has an ant problem or her pet needs care
- Capture a signature of patient, guardian or deliveries made/received
- Track mileage within the app for accurate reimbursement and billing (be a beta tester!)
- Send summary hours to ADP® to improve speed and accuracy of payroll processing

Price varies from $5-10 per employee per month + a nominal base fee depending on your time tracking needs.

Easy, accurate timesheets

Increase productivity and safety with better tracking

Incorporate QuickBooks Time into your home healthcare business for a simple, accurate time tracking solution you can use anywhere. QuickBooks Time even syncs with ADP Workforce Now® and RUN Powered by ADP® to improve speed and accuracy of payroll processing, increase productivity and simplify invoicing.

Features you'll love

Mobile Time Tracking

Employees can clock in and out from a web dashboard or mobile app. Employers can use any mobile device to manage employee time and schedules.

Who's Working Window

See who's on the clock, how long they've been working, where they're working, and what they're working on.

Alerts and Approvals

Always know when overtime is near. Get alerts before expensive overtime begins, online and on the mobile app. Receive reminders to approve timesheets before running payroll.

Reports

Take the guesswork out of payroll and employee performance reviews. QuickBooks Time's detailed reports allow you to view time tracked against clients, patients, and jobs, so you always know where your valuable time is spent.
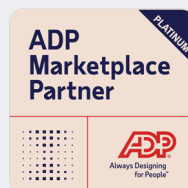

"I love the functionality of QuickBooks Time. It is the best tool businesses use to track time by services or clients. The customer support is hands down the best support from a software I have ever received!."

— Dan L., Ignite Spot
