## Scheduling, Timekeeping & Sales All in One Place

### Schedule to Budget

Based on predictive sales from your POS.

### Compare to Actual

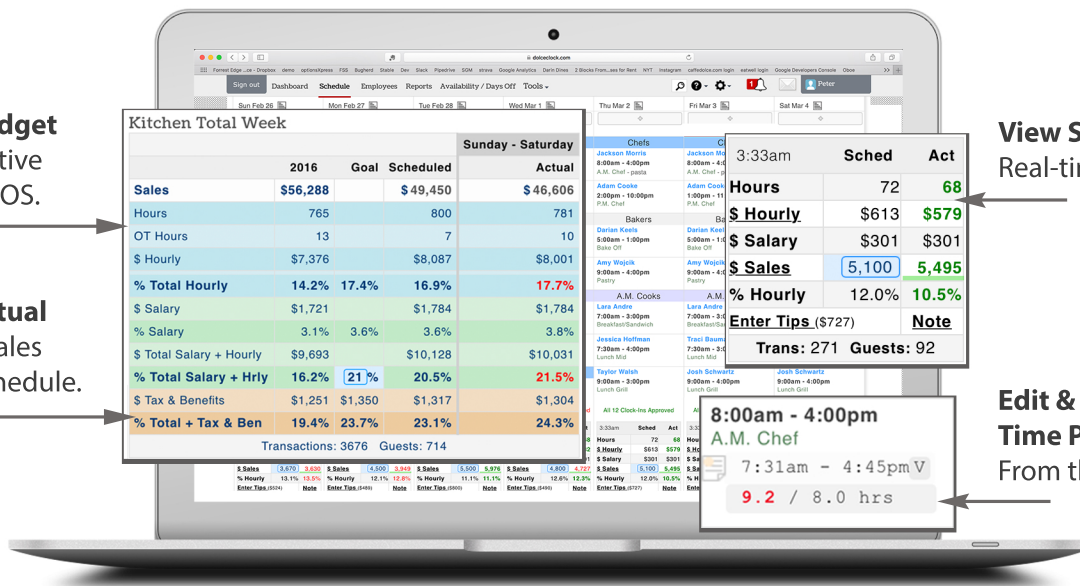

Actual labor & sales flow into the schedule.

### View Sales and Labor

Real-time, all the time.

### Edit & Approve Time Punches

From the schedule.

## POS Integrations

- **Sales Sync** – Sales flow into the schedule, to show actual vs scheduled sales and labor.
- **Tip Pooling to Payroll** – Imports card tips from POS, capture cash tips, pool and distribute to employees according to time worked, point-weighting by role, individual server, or manual adjust.
- **Multi-Unit** – Schedule multiple departments and locations simultaneously with ability to share employees across locations/roles/wages.
- **Labor Law Compliance** – Employees validate time punches and break compliance on clock-out, with optional managerial sign-off for non-compliance.
- **Two-Hour Onboard** – Dolce imports employees and sales history from POS. Full company setup and training. A \$500 value, free for Breadcrumb users.

## Key Features

- **Scheduling** – A feature rich scheduling tool. Intelligent cut/paste based on availability and role qualification.
- **Enforce Clock-in to Schedule** – Precise control with flexible override settings.
- **Export Payroll** – “One Button Payroll” inclusive of labor laws, tips, and custom inputs.
- **Free Mobile App** – Integral to a positive culture. Employees love viewing schedules & swapping shifts. Managers approve shifts on the fly and track analytics.
- **We Scale** – Perfect for restaurants with 15+ employees / \$750k annual sales, to multi-unit and franchise.
