

CELLCAST

Your Go-To Provider for Fully Managed 4G Wireless Solutions

- Primary Circuit Agnostic
- Pooled Data Plans
- 24/7/365 Monitoring and Reporting
- Commercial Grade **Cradlepoint** Hardware
- Multiple 4G Carrier Compatible
- No CAPEX Model
- National Coverage

CellCast: Failover

Cost-effectively minimize the effect of network outages with CellCast: Failover. Fully-managed 4G redundancy of any cable, fiber or DSL connection with enterprise class hardware and the most reliable 24/7/365 service available anywhere.

CellCast: Assist

A highly reliable and managed 4G LTE service for locations requiring a secondary WAN. A great solution for networks with existing routers or SD WAN appliances.

CellCast: Primary

When terrestrial options are inadequate or unavailable, CellCast can effectively provide your primary internet connection. There's no better choice in the industry than CellCast: Primary.

Month-to-Month

Have a temporary need for a primary 4G/LTE connection? Use CellCast: Primary on a simple, month to month fee structure. When your new connection is complete, return the equipment or roll the same equipment over into a Failover or Assist plan.

Think 4G Wireless—Think CellCast!
