

## Time Tracking & Scheduling for Construction & Field Service

### Automate Time Tracking

Easy mobile apps track time, GPS location, and job costs in a simple way that both field and office staff love.

### Real-Time Reporting

Know what's going on in the field with real-time reporting. Print PDF time cards and job site reports, or export the data in CSV/Excel format.

### 5-Star Rated Support

All ClockShark customers get live support from our US based team via phone, email, or chat. Have a question or need help? Let us know.

### Schedule Employees

Schedule employees with an easy drag and drop scheduler. Employees see the schedule updates in their mobile app in real-time.

### GPSTrak™ (GPS Technology)

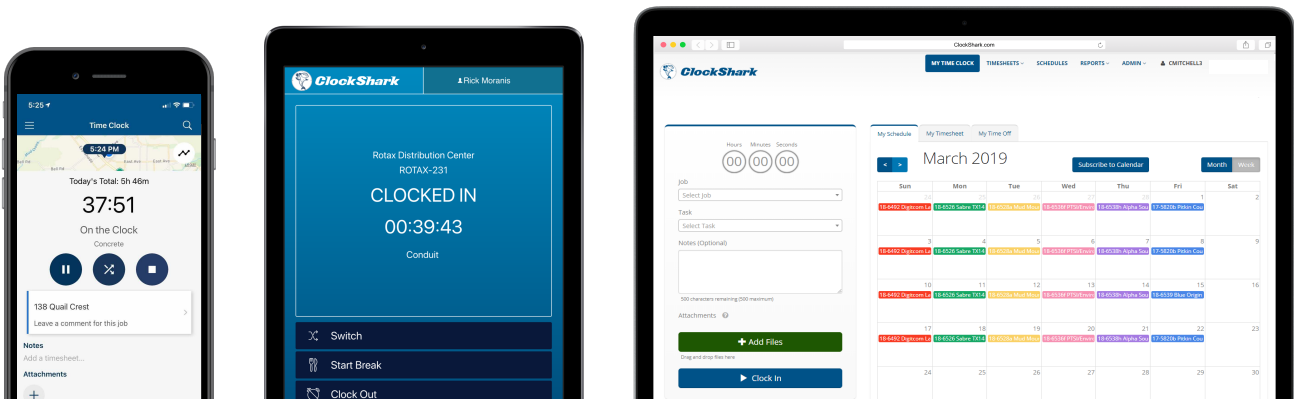

View each clock punch on an easy to read map. You can also get periodic location updates on where employees are throughout the day.

### Advanced Job Costing

Control which people can clock into which jobs or tasks, and what tasks are available to choose from when clocking into a specific job.

## Multiple ways to clock in. All your time records in one place!

Whether your employees use the web clock to clock in from their desk, KioskClock™ to clock in at your warehouse, or use the mobile app to track time from the field, all of your time data will be safe and sound in your account. It all works in real time so you know who is doing what, when and where.

# Android and iOS Mobile App Included

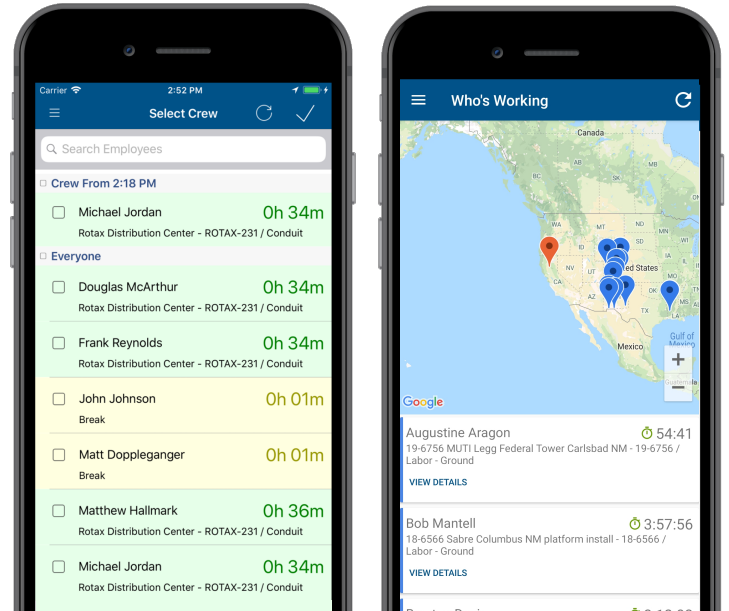

ClockShark's mobile apps let you track time, schedule employees, view employee locations and categorize job costs in a central web-based dashboard. You can see everything in real time.

## CrewClock™

The CrewClock™ feature lets supervisors or foremen in the field clock time for their whole team. Punch the clock for one guy or everyone.

## Who's Working Now

Always know where your workers are when they're on the clock. You'll know immediately if your crew is at the right job site.
