Released: March 2017

Thank you for using TrustSphere software.
This Release Notes document identifies features and functionality that have been added to this release.

Note: If upgrading from v1.1.x to v1.2.x new credentials are required
Please contact support@trustsphere.com

Compatibility & Pre-requisites

This release is compatible with, or requires as a minimum, the following components:

- Sugar 7.6.0.0 or greater
- ClientServices 1.1.0 or greater

New Features

- None

Enhancements

- SUGAR-70: Improvements to dashlets that handle large numbers of contacts
- SUGAR-71: Improvements to status dashlet; warning if CRON job is not running
- SUGAR-74: Add additional limit configuration setting to dashlets

Resolved Issues

- SUGAR-72: Relationship dashlet shows corrupt axis
- SUAGR-73: Unable to save potential contacts

Known Issues

- **The TrustView link no longer opens a view within the TrustView application.**
  - This feature has been deprecated. Customers with an existing TrustView application are now directed to the TrustView landing page.
