

OPTIMIZE YOUR WORKDAY

Ask analytic.li

When was the last time someone burst into your office and asked you a question turned into a never-ending pivot table project?

Isn't there a better way? Couldn't your time be used more strategically? Shouldn't you have an assistant to aggregate, make sense of, deliver, and turn all of the data into the answers you need? Let us introduce you to your virtual workforce assistant:

Ask analytic.li

Which departments struggle to keep employees?

How has revenue per employee changed over time?

Are any of my locations top-performing or struggling?

Which employees are driving overtime?

Which manager has forecasted overtime this week?

Why is our participation in benefits decreasing?

HOW IT WORKS

Ask analytic.li surfaces the results of your questions on the fly. We utilize natural language processing (NLP) to provide visual representations of the answers you are looking for about your workforce. Ask analytic.li makes it is easy to interrogate your data and get meaningful answers to the challenges your business faces every day.

Data Sources

Your data lives in various source systems, but it's a real challenge to integrate them. analytic.li pulls data from your operations, finance, budget, HR, and labor systems.

Data Model

Getting your data together isn't enough. Meaningful relationships must be created to build the right metrics and measures. Here's where the analytic.li data model comes in, pre-built anticipating your questions around productivity, efficiency and people.

Linguistic Schema

Now, let's make this conversational. Here's where our linguistic schema comes in to translate your data fields into the questions and answers you are looking for. Start asking your favorite questions the same way you would in your favorite search engine.

CUSTOMER SUCCESS

"Ask analytic.li makes it so much easier to find answers to complicated questions that help our Leadership team improve the employee experience at Baldor. The fact that you start typing what you are looking for and it gives you suggestions is an added bonus. It makes building my own data sets and producing visuals and trends much faster; helps make a difference in how people make decisions about things like Benefits, Leave, Overtime, and Retention."

Pam Johnson

Time & Attendance Supervisor

WHY WE CAN HELP

analytic.li is a workforce optimization solution that increases decision velocity for employers driving productivity and improving employees' work experience. Employers can act faster on combined labor, operations, human resources and finance data, and access insights organization-wide through our natural language processing capability of Ask analytic.li, dashboards, and alerts.
