

# Workforce Dimensions and IN-RGY Partnership

## Duration timecard with labor-level validation

### Features/Benefits

- » Empower employees by allowing them to quickly record their time against the correct labor-level entries
- » Reduce data entry errors by automatically controlling and validating the selected labor-level entries
- » Achieve full integration by accessing the web application directly in Workforce Dimensions, a portal, or your mobile device
- » Enjoy secure access by logging in to your report using your Kronos credentials; no information from the Kronos DB is saved in another location

Every aspect of the **Workforce Dimensions™** solution — the underlying architecture, integration, user experience, functionality, data access, delivery, and support — is designed to help you optimize your people. Powered by the industry-first **Kronos D5™ platform**, Workforce Dimensions provides a breakthrough employee experience and an unprecedented level of operational insight into your workforce management practices. Whether your goals are to increase productivity, improve compliance, control labor costs, or achieve better business outcomes, Kronos® provides the technology tools you need to manage your workforce of the future, today.

As the enterprise leader in workforce management applications, Kronos understands the need for strong integrations between software applications. That's why we've built a robust developer portal with access to our API layer. The Workforce Dimensions Technology Partner program is designed to facilitate this interoperability and drive business results.

## IN- RGY

IN-RGY delivers high value to Kronos customers by offering 20+ years of experience in workforce management and Kronos systems solutions. Our knowledge and understanding as service providers and integrators make us a valuable Kronos partner. In our quest to deliver best-in-class technologies, IN-RGY has created the Labor In-Sight product to extend the capabilities and functionality of Kronos Workforce Dimensions to deliver fully integrated and seamless solutions. Our Kronos expertise combined with our 360-degree view of HCM delivery — from strategy to execution — has helped us build trusted relationships with our customers.

### Labor in-sight duration timecard with labor-level validation

This comprehensive web application timecard allows employees to record their time against pay codes. The ultimate benefit of this solution is to manage the relationship between labor-level entries, thus ensuring that employees are not able to add a nonrelevant set of values to their time records. This enhanced control assimilates data from employees and better utilizes your internal resources in time management processing such as correcting timecards.

The labor in-sight duration timecard with labor-level validation, is built on a responsive web design that can be directly accessed via your Kronos solution from your portal or mobile device. Our web application becomes the employee's timecard interface solution and doesn't require any supplementary installation. Labor In-Sight uses Kronos APIs to read/write data and provides you with a real-time solution. Single sign-on and cloud-hosted systems are supported as well.
