

Workforce Dimensions and Passport Mobile Data Collection

Features

- » Easy to use; collects extensive data
- » Highly scalable to large organizations
- » Offline functionality includes geo-sensing features and hierarchy management
- » Compliance management, approvals, and attestation
- » Alerts to dispatchers, managers, drivers, or customers
- » Configurable forms customized to your workflow
- » Employee task self-scheduling
- » Biometrics and badge scanning

Benefits

- » Enforce compliance
- » Communicate seamlessly between dispatch and drivers
- » Gain visibility into your frontlines
- » Increase payroll and billing accuracy
- » Help ensure data accuracy

Every aspect of the **Workforce Dimensions™** solution — the underlying architecture, integration, user experience, functionality, data access, delivery, and support — is designed to help you optimize your people. Powered by the industry-first **Kronos D5™ platform**, Workforce Dimensions provides a breakthrough employee experience and an unprecedented level of operational insight into your workforce management practices. Whether your goals are to increase productivity, improve compliance, control labor costs, or achieve better business outcomes, Kronos® provides the technology tools you need to manage your workforce of the future, today.

As the enterprise leader in workforce management applications, Kronos understands the need for strong integrations between software applications. That's why we've built a robust developer portal with access to our API layer. The Workforce Dimensions Technology Partner program is designed to facilitate this interoperability and drive business results.

PASSPORT

Passport Corporation delivers powerful planning, data collection, and route execution management software for field service organizations. Our applications allow you to enhance team productivity, increase operational efficiency, and optimize performance. Gaining access to planned versus actual analytics of your data uncovers previously hidden opportunities for significant growth.

Passport's software applications span the frontlines to the back office, complementing existing systems and business processes. We support all the Workforce Central features that you love, plus the extended power and flexibility of Workforce Dimensions. Easy-to-use mobile solutions for time, labor, and job tracking enable accurate data collection, even when offline, and real-time visibility into frontline operations. Interactive back-office solutions automate job assignment, scheduling, location tracking, mapping, optimized routing of field personnel, and wireless dispatch of work orders to frontline employees.

As the mobile solutions partner for market leaders such as Kronos, Passport is the expert in frontline labor tracking to streamline payroll, improve job costing, and increase operational efficiency.

Extend the reach of your ERP or telematics system to track time, activities, and compliance

Passport's mobile app allows you to easily capture all your time and activities data, online or offline, when and where the work is done. Keep track of your employees' activities, equipment, and materials through configurable and flexible forms that support a multilevel hierarchy of tasks and sub-tasks. Even when the application is offline or out of coverage, bar code scanning and filtered drop-down lists ensure that valid data is captured. Collect customer data through mobile surveys, receive alerts when arriving or departing geofences, and enforce state meal break compliance to help increase performance. You'll gain visibility into your frontline operations that will give you more control and allow you to focus on improving performance. The application is highly scalable and supports custom forms to fit your workflow.

Passport provides many benefits, with on-the-spot activity tracking

Improve job costing and billing – Automating the collection of valid data at the source eliminates guesswork. Capturing time, output, and labor drives accurate job costing and timely billing.

Gain visibility and control – Increase accountability and control labor costs. Tracking detailed time against tasks provides the ability to reconcile labor hours with payroll hours.

Track and measure time – Compare actual time and costs against standards and manage against metrics.

Validate via location – Geofences are automatically created based on customer address. Passport will detect arrivals into these geofences, even when offline, to guarantee that your employees are where they say they are. Only valid jobs and tasks will display so that no invalid data can be captured.
