

# UKG Dimensions and Google Integrations

Every aspect of **UKG Dimensions™** — the underlying architecture, integration, user experience, functionality, data access, delivery, and support — is designed to help you optimize your people. Powered by **UKG's D5 platform**, the industry's first, UKG Dimensions provides a breakthrough employee experience and an unprecedented level of operational insight into your workforce management practices. Whether your goals are to increase productivity, improve compliance, control labor costs, or achieve better business outcomes, UKG provides the technology tools you need to manage your workforce of the future, today.

As the enterprise leader in workforce management applications, UKG understands the need for strong integration between software applications. That's why we've built a robust developer portal with access to our API layer. The UKG Dimensions Technology Partner program is designed to facilitate this interoperability and drive business results.

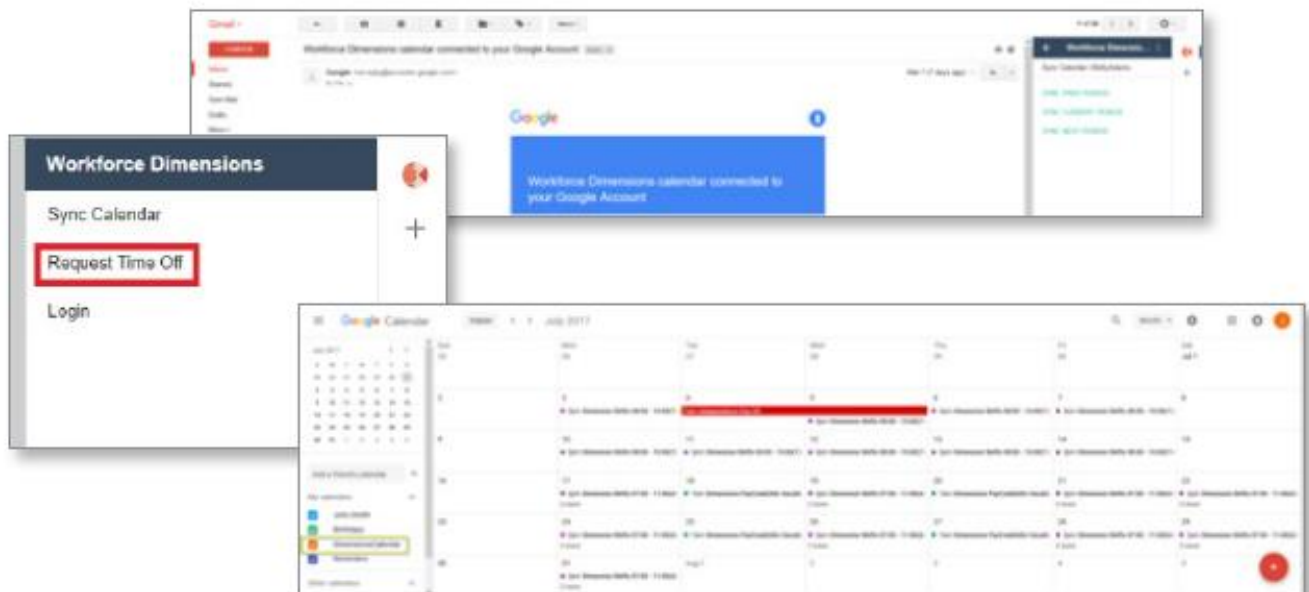

## Key benefits

- Avoid the complexity of maintaining multiple calendars by importing your workforce schedule into Google Calendar
- Synchronize your schedule with Sync Calendar in Google Calendar
- Submit time-off requests from your account
- Import valuable workforce management data for analysis, visualization, and collaboration

## Google Calendar

The integration of Google Calendar and UKG Dimensions allows users to import their work schedule into Google Calendar and integrate work and family events for better time-management and scheduling capabilities. Maintaining separate work and family calendars is cumbersome and time-consuming.

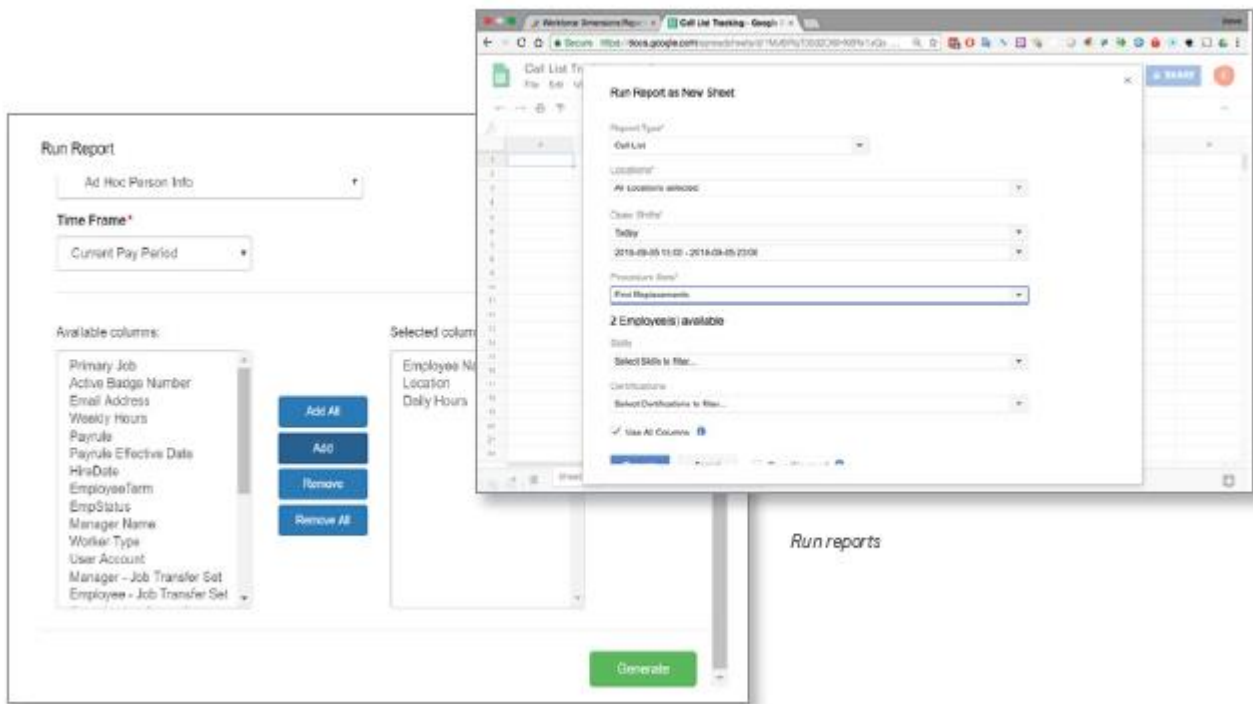

The Google Calendar add-in solves this problem and brings with it all the benefits of remote access and data backup for a seamless user experience. With the "Sync Calendar" functionality, users can sync their schedules so, the same calendar can be viewed on multiple devices. Google Calendar also allows users to submit time-off requests from their accounts.

## Google Sheets

Google Sheets is a powerful, web-based application that allows users to create, update, and modify spreadsheets and share the data live online. Any data within UKG Dimensions can be imported into Google Sheets, which has a breadth of data-analysis capabilities that allow users to conduct ad hoc analysis, create robust visualizations, and generate professional-looking reports. Third party data can easily be added to identify correlations and increase the scope of the data exploration. The embedded templates reduce report-development time and allow end users to leverage preexisting formats. Once the data is in Google Sheets, it can be opened for cross-functional collaboration.

Call List Report on Google Sheets allows users to select available Open Shifts as well as employees who are eligible to be called in. Users can filter their selection list based on skills and certifications.
