

WORKFORCE COMMUNICATIONS SIMPLIFIED

Rodio cuts through the clutter with an easy-to-use AI-powered mobile platform that connects your company resources, and is custom-structured to fit your organization.

Rodio makes communication between your front-lines and management more efficient and more engaging, delighting users and delivering results:

- Reduce employee churn
- Streamline processes
- Avoid miscommunications
- Fast retrieval of data
- Connect disparate systems
- Drive accountability

SAMPLE INTEGRATIONS

Available on

rodioapp.com

Rodio empowers both teammembers and managers.

Team member experience

Manager tools and benefits

BULLETINS

Get timely company and team updates. Then acknowledge as “read,” and discuss amongst your team.

Managers can send bulletins to an entire company or to specific teams with reports showing who’s read them.

SPOT SURVEYS

Engage with your team and company by responding to quick surveys to let your voice be heard!

Easily create surveys to get real-time feedback and suggestions from your team.

GROUP MESSAGING & IN-APP CALLS

Groups are created for each of your teams letting you connect in small groups, chat 1-on-1 or make direct calls to your teammates. These chats and calls through Rodio mask your personal phone number for your privacy.

Rodio protects privacy. Users can make anonymized in-app calls, so no one has to worry about their personal phone number being shared. Users can also flag messages for inappropriate content for their managers to review.

TEAM DOCUMENT DRAWERS

Every Team’s “Document Drawer” is where you can find, store, and share important files and attachments. Photos, videos, PDFs, and other files.

Teams stay “on the same page” by sharing files through Document Drawers as a centralized, managed repository for important files.

SCHEDULING

Punch in at the beginning of your shift then punch out at the end, and you won’t get alerts or notifications while you are “off the clock.”

Rodio provides on/off duty messaging controls that limit user notifications to ensure employees are only engaged during their scheduled work hours.

ON-THE-GO TRAINING

Complete online training directly through Rodio and continually develop the knowledge and professional skills you need to succeed.

Integrate your Learning Management System to ensure your front-lines always have access to the latest training materials.

RODIROBOT AI VIRTUAL ASSISTANT

If you have a question about schedules, policies or other such company information, just ask Rodiobot who can give you the answer or connect you to the right person.

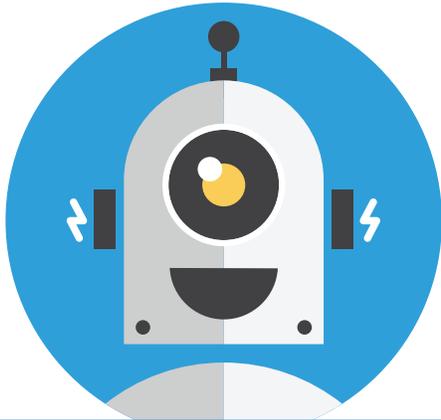

Rodiobot connects with disparate systems, providing users with instant access to company information, empowering your staff with more self-service resources.

EASY ONBOARDING

Onboarding help comes from Rodiobot, who walks you through the sign up process and shows you around.

Managers can easily manage employee access, invite new hires to Rodio and remove off-boarded staff.

This is Rodiobot. How can I help?
