

CLEARCOMPANY LEARNING

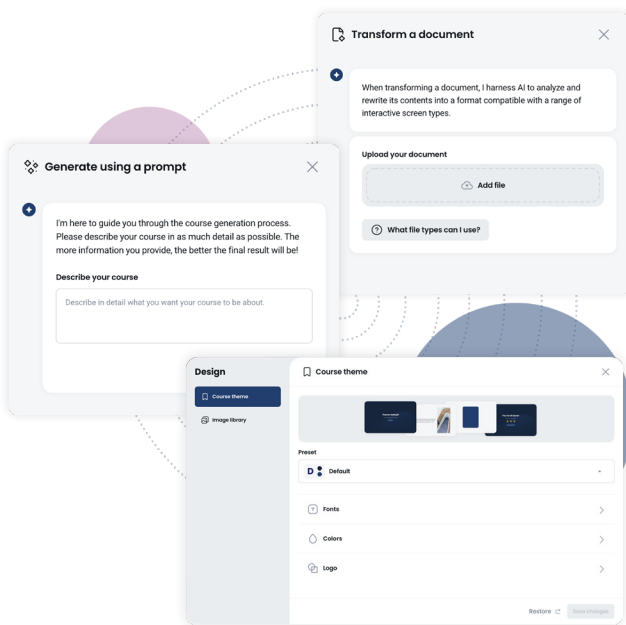

AI Course Builder

Create Courses 5X Faster Than Traditional Tools!

Learning leaders are under pressure to deliver impactful and relevant employee training programs faster than ever. The embedded AI Course Builder empowers learning teams to boost effectiveness with custom eLearning course creation in minutes, not weeks.

Create High-Impact Learning Faster—Your Way

Whether you start with existing documents, a few simple prompts, or from a blank slate, AI Course Builder flexes to fit your workflow. Each course can combine AI-generated structure, document inputs, and human refinements—so you get speed *and* control.

Built For Today's Learners

Deliver visual, interactive micro-learning experiences that align with modern learner expectations.

Customize Training Programs

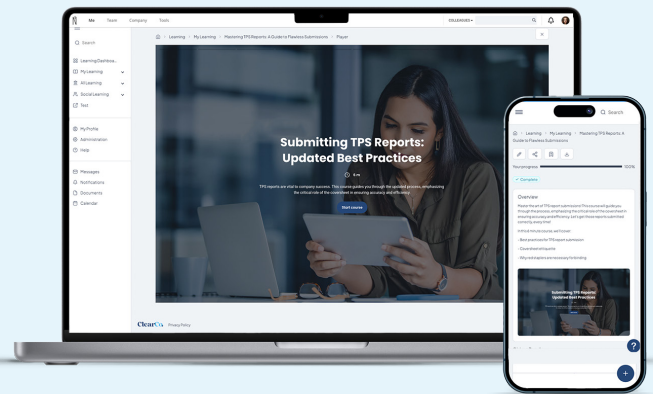

Keep pace with change. Roll out same-day learning content for policy updates, custom onboarding programs, and upskilling content.

Share Best Practices

Turn insights, tips, and how-to's into highly-relevant, personalized learning opportunities for your team members.

Fully Integrated With Your LMS

Create SCORM-compatible, trackable, and engaging courses without the extra administrative tasks.

Start from What You Already Have

Upload your existing content—like policies, SOPs, or slide decks—and let AI convert it into an interactive, structured course with lessons, visuals, and quizzes.

Use AI to Accelerate Structure and Drafting

Select your topic, tone, and learning goals, then let AI create the initial framework. Great for moments when you need a quick starting point and when efficiency matters to help achieve your goals.

Refine, Edit, and Make It Yours

Drag-and-drop to tweak structure, rewrite lessons, or adjust tone. Add branded themes, logos, or imagery using your org's visual library. The AI handles the setup. You focus on personalizing the content to your learners.
