Benefits Reconciliation Solution Guide

Transforming the Landscape of Healthcare Delivery

Key Challenges of Manually Reconciling Carrier Invoices with Enrollment & Payroll Data

- With a 12-15% industry error-rate in insurance carrier invoices, manual reconciliation of the data costs employers **days or weeks** of non-productive time and resources.
- Many give up on carrier invoice reconciliation altogether, allowing **over-payments, under-payments, and under-deductions,** which drive up unnecessary premium leakage costs.
- Manual reconciliation contributes to **increased liability, errors and compliance risks.**

What is Benefits Reconciliation?

Benefits Reconciliation is the industry's ***only*** fully-automated solution that matches carrier invoices against employee premiums and enrollment data to check for billing discrepancies and uncover hidden premium leakage.

- Gain control and full transparency into your benefits billing process
- Reduce non-compliance and liability risks
- Frees up time and resources to focus on other areas of HR
- US-based support team

TOP FEATURES

- **Integrated Data Sources.** Our relationships and integrations with HCM platforms and insurance carriers allow users to pull-in and combine data from a system of record automatically.
- **Matches & Compares invoices** in seconds. Data can be automatically matched based on SSN, employee or plan name, and other variables.
- **Gain Actionable Insights** and securely export your follow-up notes to other team members, a broker or insurance carriers to address irregularities.
- **Executive Analytics** allow organizations to understand plan utilization trends across multiple products, review plan enrollment history, and make better future decisions.

"I would advise anyone who is manually reconciling their invoices to schedule some time for a Benefits Reconciliation demo. Once you see the product and its capabilities in action you will be able to immediately recognize how useful this tool is."
