

## Secure and Easy Disbursement With TimelyTips & Mileage

The PayActiv TimelyTips & Mileage service makes income from gratuity and/or miles driven accessible faster and easier for employees. It is ideal for servers, drivers, and other customer service positions. PayActiv automatically handles the calculation of tips and disburses them directly to an employee's card or bank account. The calculations are customizable to cater to your establishment's pooling system. Best of all, you can eliminate the need to keep large amounts of cash on hand and rest easy with a 2-day cash float.

*As more transactions become electronic, processing non-cash tips may become more difficult...As a result, many are proactively incorporating solutions that can make it much easier to pay team members.*
