

Workforce Dimensions and Form.com Data Collection Platform

Key Features/Benefits

- » **MOBILE ACCESS** Complete your forms on desktop, tablet, or smartphone
- » **OFFLINE ACCESS** Collect data without a connection while retaining the app's full functionality
- » **COURSE CORRECTION** Automatically calculate scores, publish results, and escalate issues based on form data
- » **TASK MANAGEMENT** Define user roles, set up automated alerts, schedule deadlines, and prioritize criticality levels
- » **INTEGRATION** Sync with your current IT systems for bidirectional integration

Every aspect of the **Workforce Dimensions™** solution — the underlying architecture, integration, user experience, functionality, data access, delivery, and support — is designed to help you optimize your people. Powered by the industry-first **Kronos D5™ platform**, Workforce Dimensions provides a breakthrough employee experience and an unprecedented level of operational insight into your workforce management practices. Whether your goals are to increase productivity, improve compliance, control labor costs, or achieve better business outcomes, Kronos® provides the technology tools you need to manage your workforce of the future, today.

As the enterprise leader in workforce management applications, Kronos understands the need for strong integrations between software applications. That's why we've built a robust developer portal with access to our API layer. The Workforce Dimensions Technology Partner program is designed to facilitate this interoperability and drive business results.

Form.com

Form.com data collection platform

Form.com is an enterprise mobile forms solution featuring powerful task management and workflow functionality for gathering feedback and observational data.

Form.com enables a seamless user experience by integrating the data held within Workforce Dimensions into your forms. The combination of Form.com and Workforce Dimensions provides a seamless task management and data-collection system that intelligently routes users through forms and automatically assigns follow-up assignments and alerts based on their input.

Form.com is in the business of helping great companies run better. Whatever needs your organization has, our professional services team will work with you to ensure you're headed down the path to continuous improvement. Our experienced solutions architects will help you migrate your existing paper or spreadsheet-based forms and checklists, or re-create your process entirely from scratch on our mobile platform. Our team will determine the best way to design, configure, and deploy a custom solution for your organization that automates processes and workflows with corrective actions, notifications, and reports. Together, we'll expedite the distribution of action plans, tasks, alerts, and CAPAs (corrective actions preventive actions) in innovative new ways that fit your unique process perfectly.

Integration with your IT infrastructure

Enterprise data does not live within a single system, and the ability to communicate between different databases and software is crucial. Our experts can help you map what data should be integrated into the forms and where collected data should be exported from Form.com.

Mobile forms

When a user logs in and performs a sync on their mobile device, all their approved forms are updated and tasks and notifications are instantly available to them. Data from external sources or previously collected data can be also be pre-populated into forms so users don't have to repeatedly enter the same information. Users can capture dates, time stamps, and GPS coordinates and attach photos to gather more evidence from the field.

Offline capabilities

Even when you are working in remote locations with poor internet connectivity, Form.com can continue collecting data without any limitations. Once the connection is reestablished, forms automatically sync to the server for further processing and initiate workflows or other automated events.

Workflows

Form.com's powerful workflow automation and task management features are designed to automate manual processes and streamline your operations. Based on entered data, the form can calculate scores, suggest actionable items, send alerts, and assign follow-up forms or tasks to the responsible parties.

- **Intelligent forms:** Easy-to-use forms dynamically change based on who you are, where you are, and what you're doing.
- **Mobile and offline access:** Complete forms, collect data, and manage inspections from virtually anywhere, even without an internet connection.
- **Action plans:** Automatically trigger workflows, send notifications, kick off approval processes, and schedule follow-up tasks with due dates and criticality levels.
- **Process automation:** Autofill forms with data, including user login, device info, previous responses, GPS coordinates, dates, and time stamps.
- **Integration:** The platform seamlessly connects with your other applications, creating bidirectional data synchronization and ensuring "one version of the truth."
- **Flexibility:** Form.com's solutions can be constructed modularly and adapt to suit any industry or process.
