Barb Mills  
Accountant

Barb Mills is the accountant at American Self Storage. Prior to using When I Work, it was difficult to ensure her employees were at the right place at the right time across their 10 locations in North Carolina. The scheduling and time tracking process was cumbersome and could cause employee no-shows. As a business with multiple locations, sometimes managers wouldn't be aware of no-shows for hours resulting in a poor customer experience.

Since switching to When I Work, she knows exactly when and where an employee is clocking in and out from with GPS enforcements. The new process builds trust and accountability with her employees while giving her peace of mind that shifts are covered.

Another way Barb builds trust with her employees is ensuring they are always paid on time and accurately. Before using RUN Powered by ADP®, she entered hours manually into ADP and spent hours double checking all of her entries for human errors.

Using RUN Powered by ADP®, prevents clerical errors, creates a smooth payroll process, and saves Barb valuable time. Barb mentioned, "I've processed payroll twice using RUN Powered by ADP®, and it went perfect— there were no glitches."

With the extra time back, she is able to pay closer attention to details that save her business money like managing overtime and labor budgets.

American Self Storage is a top quality storage facility providing service in 10 locations across North Carolina.
