

# Connector FAQ

## What is the Deputy Connector?

The Deputy Connector is an application that allows your Deputy account to connect to your ADP® account.

## Why do I need the Deputy Connector?

With the Connector, Deputy and ADP® integrate to seamlessly sync employee data and send timesheets from your Deputy account to your ADP account. You need the Deputy Connector to integrate the two accounts.

## How do I install the Deputy Connector?

First, go to the ADP Marketplace at [apps.adp.com](https://apps.adp.com). Search for “Deputy Connector”. Select the “Deputy Connector” app for your payroll product, either RUN Powered by ADP® or ADP Workforce Now®, depending on which platform you have. The connectors have a red and white logo. Once it’s open, select the “Deputy Connector” edition and proceed through the shopping cart process. You must install the Deputy Connector from ADP Marketplace.

## When can I install the Deputy Connector?

You can install the Deputy Connector after you have set up both a Deputy and ADP® account. If you already have both accounts, you can install the Deputy Connector immediately.

## Who can install the Deputy Connector?

Deputy clients who use RUN Powered by ADP® or ADP Workforce Now® can purchase and install the Deputy data connector from ADP Marketplace.

## Who can link a Deputy Account to ADP?

Only Deputy users with Location Manager and System Administrator access can install the Deputy Connector.

## Is this a one-time installation?

Yes.
