

Simplify payroll processing

7punches users can export their payroll data from 7shifts and import it into ADP for a smooth payroll process.

Save time, money and reduce payroll errors, and improve the way your business operates.

How this export helps restaurateurs:

Streamline Payroll

Available on 'The Works' package and above, the 7shifts - ADP Workforce Now export will streamline your payroll processes, business wide.

A simple solution to the pains of Payroll, this will remove the time consuming job of payroll data entry, human error and save your business money.

Save Time

No more formatting and spending time entering in your payroll data by hand. 7shifts, 7punches and ADP Workforce Now, work together to export the data for you.

Spend less time in front of a computer and more time working on your business.

Reduce Payroll Errors

Payroll errors represent a considerable cost for business every year. By removing manual entry from the payroll process, you are guaranteed more accurate data.

Using 7punches time clocking and ADP Workforce Now, together this process will help to reduce inaccurate employee time tracking, errors in employee information and employee documentation.

Flexible Processing

The 7shifts - ADP Workforce Now export will provide you with flexibility on processing payroll because you can export individual locations or company level.

Choose what works best for you and your company.

The world's best restaurants use 7punches to track their time & attendance
