

# Workforce Dimensions and Passport Event Staffing

## Features/Benefits

- » Manage event staffing in Workforce Dimensions
- » Native integration with Workforce Dimensions for:
  - Simple, clean user interface (UI)
  - Creating, updating, or removing shifts for all job types
  - Canceling or rescheduling an event with a few clicks
  - Working with your organizational structure and labor categories
- » Manage staffing levels based on your needs (location, event type, time of event, etc.) via dynamic event templates
- » Assign unique labor categories to shifts for any event
- » Calculate mileage/drive time for mobile staff
- » Dynamically shift resources with real-time point-of-sale (POS) system integration

Every aspect of the **Workforce Dimensions™** suite from Kronos® — the underlying architecture, integration, user experience, functionality, data access, delivery, and support — is designed to help you optimize your people. Powered by the industry-first **Kronos D5™ platform**, Workforce Dimensions provides a breakthrough employee experience and an unprecedented level of operational insight into your workforce management practices. Whether your goals are to increase productivity, improve compliance, control labor costs, or achieve better business outcomes, Kronos provides the technology tools you need to manage your workforce of the future, today.

As the enterprise leader in workforce management applications, Kronos understands the need for strong integration between software applications. That's why we've built a robust developer portal with access to our API layer. The Workforce Dimensions Technology Partner program is designed to facilitate this interoperability and drive business results.

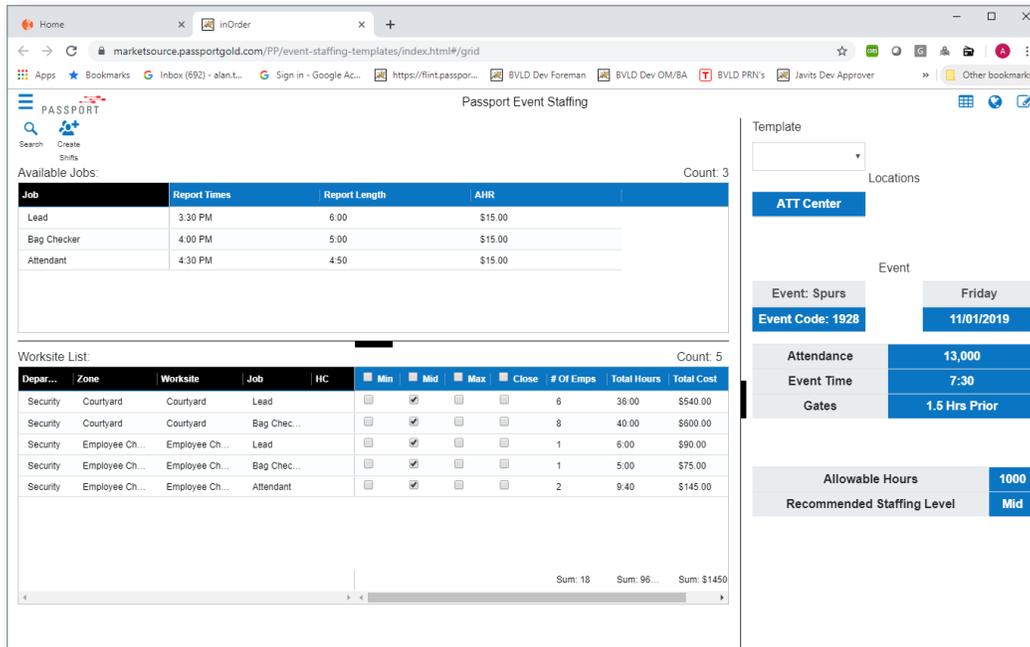

## PASSPORT

### Passport Event Staffing

Passport's Event Staffing is a dynamic solution designed specifically to streamline and simplify the process of creating and managing event staff schedules in Kronos.

### Designed and built for events management

Passport Event Staffing is the only solution built from the ground up to manage your events scheduling needs in Workforce Dimensions. With over a decade of experience as a Kronos Technology Partner, Passport is uniquely qualified to build a solution that both natively integrates with Kronos and uses an interface that will be comfortable for any Workforce Dimensions user. Built with the input of events-industry leaders, our solution is sure to save your scheduling staff time and increase efficiency.

## Template technology to simplify event scheduling

Our cloud-based solution uses a unique, template-based process to simplify the scheduling of your events staff. Your team can create event templates that significantly reduce the work involved in scheduling individual events. Templates, which can be tailored to your specific industry and needs, are created by event type and include editable default staff levels by job based on your business history and requirements.

## Assign labor categories and cost centers

Easily assign Kronos labor categories and cost centers to an event so all shifts have a proper transfer. The solution supports unlimited event labor category and cost center combinations.

## Streamlined event schedule management

Easily create a schedule using our templates and import the schedule into Workforce Dimensions with a single click. Modify or delete schedules as needed with our two-way Kronos API-based integration. You can even dynamically shift resources with our real-time POS system integration.

## Use your existing Kronos data

We use your own Workforce Dimensions data for functionality that is both simple and powerful. Your organizational structure and labor categories are used for secure and efficient scheduling and data management.

## Simple UI

Our simple but powerful UI was built strictly to Kronos standards and will be familiar and comfortable to use for any Workforce Dimensions user. Only a few screens are needed to take full advantage of the system.

## Direct API integration to Workforce Dimensions

As a longtime Kronos partner, Passport knows how to fully utilize the native API integrations for the most efficient and maintenance-free solutions.
