

allGeo for ADP Workforce Now®

Frequently Asked Questions

What is allGeo?

allGeo helps field service businesses take the complexity out of managing their field operations. With allGeo Time Clock, field workers can use their smartphones to clock in and out of job sites while managers have a comprehensive dashboard to view and monitor their field workers in real time, giving businesses full control over their field operations. allGeo Time Clock is part of the enterprise-grade allGeo platform that spans all areas of the field service workflow including scheduling and dispatch, monitoring and delivery, and measurement and reporting.

How does allGeo integrate with ADP Workforce Now®?

The allGeo application integrates with ADP Workforce Now for bidirectional exchange of employees, schedules, attendance and their field activity logs. This real-time integration pushes payroll-related data from the allGeo application to ADP. Users can send data to ADP manually or set up an automated process.

The allGeo app will send the following fields to ADP:

- Service Hour (Regular, Overtime and Double Overtime)
- Clock-in time and Clock-out time with Job Site Details
- Mileage

What makes allGeo different from other time-clocking solutions?

Geofence technology: Record field employees' attendance at job sites. The geofence feature alerts businesses when an employee reaches their assigned job site and travels outside of it. Businesses can measure the exact amount of time employees spend at all their assigned job sites during work hours. Monitoring is automatically turned off after work hours based on custom HR policies and employee privacy guidelines (e.g. switch off when employee is at lunch).

Field service workflow: allGeo includes automatic scheduling, dispatch using SMS/IVR/app notifications, monitoring, mileage, field data collection, performance measurement, reporting and web API (or pre-built connectors) to integrate with other software systems in your workflow.

Enterprise-grade features: Leverage features such as identity management with single sign-on (SSO), HIPAA-grade security and high availability (99.99% uptime), making it a secure and reliable aspect of your business. allGeo is a cloud-hosted solution requiring no on-premise software to be maintained.

How do I deploy the allGeo time clocking solution?

You can set up allGeo in five steps:

1. Log into ADP Marketplace.
2. Subscribe to [allGeo through ADP Marketplace](#).
