

# The phone system for modern business

## Centralize your workflow

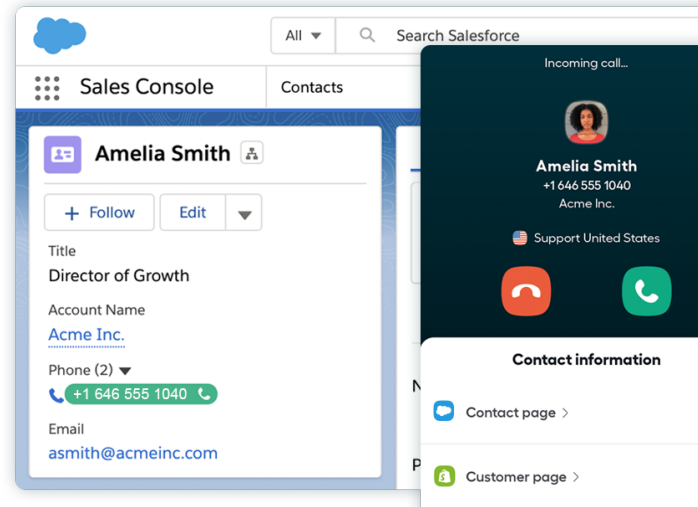

Make outbound dials and receive inbound calls without ever switching screens. See caller details and a link to the associated Salesforce page appear as soon as the phone rings - no need to spend time searching for the right record.

## Turbocharge productivity

Get rid of manual data entry with automatic call logs including notes, dispositions, and recordings. Save time with easy click-to-call and PowerDialer features so reps can book more meetings and close deals faster.

## Smarter insights

Use our Salesforce Omnichannel integration to easily manage which team members are available. Set up custom workflows with call tagging. Report natively on phone activity with the pre-built dashboard and gain deeper insights on every call.

Set up the integration in 5 minutes. No professional services required.

## Why Aircall?

### Easy CTI Setup

No hardware needed. Simple and beautiful UI for admins and agents.

### Fast
