## Tax Credits

### Maximize valuable tax credits without the extra effort

Tax credits are a great way to save your organization money. However, it's cumbersome to find all available tax credits across multiple federal and state databases, understand tax credit types and track qualification criteria.

Even when eligible tax credits are identified, you still have to forecast credits and apply and respond to inquiries – typically a manual process. Many organizations find the complexity of and time involved in identifying and capturing tax credits outweighs the monetary benefits received.

### Automated services backed by years of experience

ADP SmartCompliance<sup>®</sup> combines an intelligent platform with deep domain knowledge from dedicated specialists to help organizations of every size and type identify and capture the maximum tax credits for which they are eligible. With audit support, enhanced security, a simplified employee experience and ADP searching tax credit opportunities on your behalf – organizations can benefit without applying extra resources.

ADP SmartCompliance works with most major payroll, ERP and hiring systems, so you can take advantage of ADP's tax credit expertise regardless of the systems you have in place today.
