Migrating your enterprise's data and applications to the cloud provides both ease of access and protection of critical enterprise information.

This move also has its challenges:
• Ensuring security
• Establishing consistent performance
• Keeping costs in control

CloudLink helps to solve these challenges, no matter your Cloud Service Provider (CSP). CloudLink is Zayo's direct, private and secure connection from enterprise locations and data centers to major CSPs with bandwidth speeds up to 100G.

Zayo's owned and operated fiber network supports the world's largest companies with comprehensive reach, reliability and performance. Connect effortlessly and consistently at the speed you need.

End-to-end last mile cloud connectivity	Flexible access types	100G capable	Data center agnostic	Cloud-to-cloud connectivity

PRODUCT BENEFITS

Performance & Reliability
• Multiple on-ramps to each cloud provider offer highly available and physically diverse designs with increased protection.

• Zayo's SLAs guarantee 100% uptime with redundant and diverse options and sub-millisecond recovery times.

• Zayo's self-healing core network helps to ensure you stay connected through diverse network routes.

• Zayo proactively augments bandwidth across its network so you do not experience interruptions in performance.

• CloudLink's private connections offer reliable low latency and consistent speeds, up to 100G.

Flexible Connectivity Options
• Leverage global strategic cloud partnerships with AWS, Azure, GCP, Oracle, IBM, Salesforce, Alibaba and many others.

• Connect from your locations, not just major data centers, with Zayo's first and last mile connectivity.

• Select from multiple transport options: Ethernet, IP-VPN, Wavelengths and Dark Fiber.

• Customize your cloud connectivity with a diverse design to enhance data protection and availability.

• Connect privately from cloud to cloud, reducing costs, improving efficiency and lowering latency.

Cost Optimization & Support
• Bypass the public Internet and lower expensive data egress fees by 70% on average.

• Access 24/7/365 support from Zayo's Network Operations Center (NOC).
