

Timeero for ADP Workforce Now®

Frequently Asked Questions

What is Timeero?

Timeero is a mobile workforce tracking solution that provides small and midsize organizations with insights into where their employees spend their time.

Primary features include:

- **Location tracking:** Track your employees' location activities when they are on the clock to see where they've been and when they were at specific locations.
- **Time tracking:** Track employee time and attendance.
- **Mileage tracking:** Track employee mileage for reimbursements.
- **Geofencing:** Automatically clock employees in or out when they enter or leave the geofence.
- **Scheduling:** Calendar in employee jobs at different times of the day. Jobs and assignments can get dispatched and employees get notified on their smartphones through the Timeero mobile apps.
- **Reports:** Generate reports of time worked and other field activities.

How does Timeero integrate with ADP®?

Timeero integrates with ADP Workforce Now®. Essential employee data (e.g., name and email) is automatically synced from ADP to Timeero to minimize administrative processes. Timesheets and mileage from Timeero can be imported to ADP Workforce Now.

What makes Timeero different from other time and attendance products?

Many time and attendance systems only capture clock in/out GPS points or will only capture locations a few times an hour (every 15 or 20 minutes). We provide more location activity insight by capturing more movements, and other location context. Our mantra is simple: To provide you with the best activity insight on how your field teams work.

How much does Timeero cost?

Timeero costs \$5/user/month + \$10/month base fee, with no hidden costs.

How does GPS tracking work?

GPS tracking uses smartphone apps to track employee time and location. Timeero provides native iOS and Android apps to enable location tracking that employees can download on their phones.

Are employees' locations tracked while off the clock?

No. The apps will only capture employees' locations while they are on the clock. Once a user clocks out, location tracking stops and no locations are recorded. Timeero uses technology like geofencing to remind employees to clock in/out while off the clock.

About Timeero

Timeero is a mobile workforce tracking tool for businesses that want to track employee time, location or mileage.
