

Fusion Connect Wireless Secure 3G and 4G Nationwide Network Access

SUPPORT YOUR BUSINESS APPLICATION NEEDS, WITH A STABLE AND RELIABLE CONNECTION.

Remote Access

If your business has branch offices, retail stores or restaurants, or any other type of locations that do not have access to DSL or Cable, Fusion Connect Wireless Broadband provides always-on, high-speed connectivity to the Internet and your corporate VPN.

Redundant Access

If you have DSL, Cable, Ethernet, or T1 access today, Wireless Broadband is the perfect backup should you experience disruptions in your existing fiber- or copper-based service. Wireless Broadband doesn't use the same last-mile local loop facilities as terrestrial broadband access services, so it provides complete redundancy. And, unlike dial backup, Wireless Broadband gives your employees access to the Internet and your corporate VPN at broadband speeds.

Quick Connectivity

If you've ordered terrestrial broadband connectivity, there's no need to wait until it's connected to provide access to your users. Use Fusion Connect Wireless Broadband as a temporary access method while you wait for your circuit to be delivered. It takes a fraction of the time to configure and install compared to traditional wireline connections. And, it can be used at one-time events, like conferences or festivals, where getting a Cable or DSL connection for a day or two doesn't make sense.

THE FUSION CONNECT ADVANTAGE

SINGLE SOURCE FOR THE CLOUD

Fusion Connect offers a full range of cloud communications, cloud connectivity and cloud computing solutions nationwide.

SUPERIOR VOICE QUALITY

Fusion Connect's voice network achieves 99.999% availability, providing customers with the highest level of availability in the industry.

PROVEN EXPERTISE

We've been serving businesses with innovative communications services for over two decades.

EXPERIENCED CUSTOMER SUPPORT

Our U.S.-based technical experts respond quickly and efficiently, 24/7/365.

Availability to Keep Working

Fusion Connect Wireless Managed Failover automatically detects access issues with wireline connections and diversifies your Internet and network connectivity with wireless broadband service.

Secure Access at Broadband Speeds

Fusion Connect Wireless Broadband is a good fit:

- For remote locations that aren't able to connect via DSL or Cable
As a quick-start solution while you're waiting for your primary broadband connection to be installed or for a temporary location
- As both a fixed wireless solution and a managed failover solution for your existing T1, Ethernet, DSL, or Cable service

Fusion Connect deploys all the necessary equipment and sets up the service, then manages and monitors the network to ensure it's working for you. Fusion Connect Wireless Broadband access uses IPsec encryption.

Subscribe to Fusion Connect Wireless Managed Failover Service and increase the availability service-level agreement for your Fusion Connect primary connectivity solution.

Connectivity

Fusion Connect Wireless Broadband Service allows you to:

- Deliver 100% coverage to all your remote locations
- Open stores and branch offices on time, while you wait for broadband or T1 connectivity
- Employ a fully redundant backup solution to ensure business continuity
- Enjoy sufficient bandwidth to support your business-critical applications
- Rely on a single provider for all of your network and security needs

Fusion Connect provides nationwide coverage, including 4G LTE.
