

Secure push-to-talk

For Android, iPhone, iPad, iPod Touch, BlackBerry, Windows Phone, Windows Mobile and PC

Create your secure, privately managed network in minutes.

Try it out at zellowork.com - it's free for up to 5 users!

Zello is a live voice, push-to-talk app for your smartphones, tablets and devices.

It works on any Wi-Fi network and data plan.

Zello for Work offers centralized, web-based user and channel administration.

Popular Devices

Add push-to-talk to any Android, Apple iOS, BlackBerry or Windows Phone device and join 80+ million connected Zello users.

Mobile Computers

Zello can be easily integrated into existing scanners used for field service, warehouse, or mission critical apps. By adding Zello to your existing devices, you eliminate the need for a second device or cellular plan.

PC Dispatch

Zello turns your Windows PC into a simple and powerful dispatch that runs with your other applications.

Zello Benefits

- Increase security with digital signature and voice encryption
- See live user availability status
- Play missed messages with the History feature
- Allow users to configure a hardware PTT button
- Keep data usage low for cost savings
- Switch to any of the 22 languages
- Use Bluetooth and specialized headsets, speakers and mics for true PTT feel

Zero Downtime

With 80+ million users, Zello has delivered more than 99.99% availability in more than five years of service.

Technical Support

Paying customers are eligible for 24/7 support.

Help employees get an instant response and collaborate better.

Centrally manage Zello users, groups and settings from any browser

You can have a PTT network in just two steps:

1. Set up network in minutes.
2. Install the Zello app on your devices.
