

# **AireSpring Managed Mobility Service**

**Simplified, Secure, and Scalable Enterprise Mobility Management**

## ABOUT AIRESPRING

AireSpring is a global managed network services provider delivering comprehensive, fully managed solutions to multi-location and multinational enterprises. By unifying communications and network services under a single, proprietary platform, **AireSpring empowers businesses with seamless control, enhanced security, and operational efficiency.** Our award-winning solutions optimize enterprise connectivity, reduce costs, and streamline IT management.

## AIRESPRING'S MANAGED MOBILITY SOLUTION

AireSpring's Managed Mobility Solution is a fully managed, enterprise-grade mobility management service and platform that simplifies the complexity of mobile connectivity across multiple wireless carriers. By consolidating mobile networks, streamlining device management, and providing real-time analytics, our solution delivers seamless control over enterprise mobility—reducing costs and enhancing security while ensuring employees stay connected.

## KEY FEATURES & BENEFITS

- **Seamless Multi-Carrier Integration** – Unify and manage multiple mobile networks through a single provider for optimal coverage and cost savings.
- **Consolidated Billing & Cost Control** – Simplify invoice management with a single, consolidated bill across all carriers, reducing administrative overhead and improving spend visibility.
- **Enterprise Cloud Management Platform** – Gain real-time visibility and control over mobile devices, usage, and expenses through an intuitive, centralized platform.
- **Advanced Analytics & Insights** – Access in-depth reporting on trends, spending patterns, and inventory to optimize mobility strategy and cost efficiency.

## KEY FEATURES & BENEFITS (cont.)

- **End-to-End Device Lifecycle Management** – From procurement and staging to break/fix and secure recycling, we provide full lifecycle support for your mobile devices.
- **Managed Device as a Service** – Outsource complete management and procurement of devices, including device protection, staging and kitting, repair, secure recycling, replacement, and device storage.
- **Security & Mobile Device Management (MDM) Support** – Ensure compliance and protect enterprise data with robust security and MDM capabilities.
- **Tailored Procurement Process** – Customize your mobility procurement workflow to align with business requirements, ensuring the right devices and services for your teams.
- **Automated Alerts & Real-Time Notifications** – Proactively monitor and manage usage, preventing overages and identifying anomalies before they impact your budget.
- **Access to the Latest Mobile Devices** – Stay ahead with a wide selection of the newest smartphones, tablets, and IoT devices.

- **Future-Proofed Investment** – Our scalable solutions evolve with your business needs, ensuring long-term value and flexibility.
- **Dedicated Single Point of Contact** – A dedicated mobility expert simplifies ordering, changes, and ongoing account management.
- **24/7/365 Support & Network Operations Center (NOC)** – Get around-the-clock assistance for rapid issue resolution and continuous mobility optimization.
- **Deep API Integration** – Automate and accelerate mobility management tasks with seamless API integration for ordering and change management.
- **Customer Success Team** – Experience proactive, high-touch support focused on your business goals and mobility strategy success.

## IMPLEMENTATION & DEPLOYMENT STRATEGY

AireSpring ensures a smooth, efficient deployment of your enterprise mobility solution through a structured, hands-on implementation process.

### 1. Planning

A dedicated Project Manager is assigned to assess requirements and develop a customized implementation roadmap.

### 2. Launch

Finalize and approve the rollout plan, including rate plans, features, and account setup.

### 3. Deployment

Distribute welcome kits, provision selected equipment, and coordinate end-user training as needed.

### 4. Review & Optimization

Conduct an initial bill review to ensure accuracy and alignment with expectations.

Customer Administrators receive access to the AireSpring Mobility Portal for real-time plan and device ordering and changes, usage alerts, reporting, and easy billing management.

### 5. Ongoing Support & Transition

Review transition details and establish long-term support strategies.

Ensure continuous optimization with regular account reviews and proactive support.

## WHY AIRESPRING?

With decades of experience in managed communications and network solutions, AireSpring delivers enterprise-class mobility management with best-in-class support, advanced automation, and seamless carrier integration—allowing businesses to stay agile, secure, and cost-efficient. Eliminate billing headaches by consolidating multiple carriers into a single, easy-to-manage invoice with transparent cost breakdowns.
