

TOP 10 REASONS TO TURN TO AIRESPRING FOR SIP TRUNKING

Replace your local PRIs and analog lines with SIP trunks (session-initiation protocol) and connect to one of the largest, most reliable SIP networks in the nation

- **1 4 Billion Calls Per Month**
You'll be joining thousands of customers who enjoy the benefits of our carrier-grade network that processes over 4 billion calls per month.
- **2 Owned and Operated Network**
This isn't a resold product. AireSpring owns and operates one of the oldest, most stable native SIP networks in the nation.
- **3 Geo Redundant Network**
AireSpring's native SIP network is geo-redundant, meaning your calls are backed up in multiple, secure locations across the country.
- **4 Security**
SIP Trunks are exposed to the Internet. That's why it's critical that your paths run on a secured network with an anti-fraud system in place. AireSpring uses an Integrated Transport Layer Security (TLS) and Secure Real-time Transport Protocol (SRTP) encryption to protect your communications.
- **5 Competitive Rates**
AireSpring offers some of the most competitive rates for a true, enterprise-class quality SIP Trunking service.
- **6 Number Porting Anywhere**
No matter where you are, it's easy to get DIDs anywhere in the country with AireSpring SIP. If you want to keep your numbers, we can port those, too.
- **7 Direct Termination Overflow (DTO)**
This feature add-on for AireSpring SIP Trunking means you'll never miss an important call. In the event that your circuit goes down, or if all your 23 lines are being used, DTO will automatically route incoming calls to any designated number of your choice.
- **8 Geo Redundant Network**
AireSpring's native SIP network is geo-redundant, meaning your calls are backed up in multiple, secure locations across the country.
- **9 Rapid Activation**
If you've got the circuits, AireSpring can turn up your SIP Trunks in a week. You will receive a dedicated Project Coordinator who will oversee your order from entry until turn-up to ensure that you are satisfied.
- **10 AireCare**
Free with your SIP Trunking service, the AireCare customer portal allows you to make changes to your call flow processes all on your own. Re-route DIDs on the fly as your office grows and shifts over time.
