

# Lumen® Fiber+ Internet

Enterprise-grade performance available on demand.

Small and medium businesses need internet that can handle the bandwidth demands that next-generation business applications and data require to operate efficiently. Fiber+ Internet delivers the scalability, reliability and simplified self-service shopping options to help you easily upgrade your network capacity as your business grows and evolves.

## **Reliable, scalable bandwidth**

Upgrade bandwidth to support next-gen apps as your business grows with reliable services and optional installation.

## **Enterprise-grade at small business prices**

Modernize your existing investments and run next-gen apps without reinvesting in your infrastructure.

## **Exceptional customer experience**

Adjust your upload and download speeds as needed through a streamlined digital portal. Lumen delivers business value with predictable, flat monthly service rates.

## Use Cases

### **Accelerating business growth with reliable connectivity**

Gain efficiency and maximize productivity with fast uploads, downloads, file sharing and more on a high-speed network connection with the power to upgrade in a few clicks.

### **Utilizing cloud applications on your existing network**

Minimize downtime while accelerating productivity with the network speed and reliability you need to optimize your cloud environment.

### **Gaining access to a full technology eco-system**

Simplify IT operations and ordering through our easy-to-use digital portal and get enterprise-grade support when you need it, delivered with a predictable pricing model.
