

# Simplify payroll processing with 7shifts and ADP Run

Save time on processing payroll and eliminate manual errors by connecting 7shifts with your ADP Run payroll system to sync hours worked.

**How 7shifts and ADP Run work together to help restaurateurs:**

## Streamline Payroll

Available on 'The Works' package and above, the 7shifts - ADP Run connection will streamline your payroll processes, business wide.

A simple solution to the pains of payroll, this will remove the time consuming job of manual payroll data entry, human error and save your business money.

## Save Time

Eliminate manual formatting and spending time entering in your payroll data by hand from one program to another.

7shifts and ADP Run work together by sending all your staff's hours worked directly to your payroll platform. Spend less time in front of a computer and more time working on your business.

## Reduce Payroll Errors

Payroll errors represent a considerable cost for business every year. By removing manual entry from the payroll process, you are guaranteed more accurate payroll data.

Using 7punches time clocking (an integrated part of the 7shifts scheduling platform) and ADP Run together this process will help to reduce inaccurate employee time tracking, errors in employee information and employee documentation.

## Flexible Processing

Provide your restaurant with flexibility to process payroll in a way that works for you. With a connection between 7shifts and ADP Run you can pass payroll information for specific locations or entire company at once.

The world's best restaurants use 7shifts to track their time & attendance
