

TSHEETS FOR MANUFACTURING

Time is money

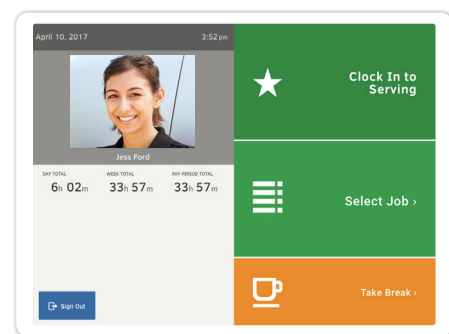

Make every second count with automated time tracking and scheduling tools

Collecting and calculating employee hours is one of the most time-consuming, yet essential, aspects of a job. From gathering and correcting timesheets to manually entering employee time, payroll can take hours. And getting it wrong can result in costly overtime and lost revenue. TSheets time tracking and scheduling streamlines payroll and saves money, with features like tablet-optimized time clocks and automatic overtime calculations.

Virtually eliminate time theft

Manufacturing business owners say employee time theft happens 45% of the time.¹ Buddy punching, or when an employee clocks an absent employee in or out, is considered time theft, and a few minutes here and there can really add up. The TSheets tablet-based time clock is equipped with facial recognition, so suspicious clock-ins are flagged for review.

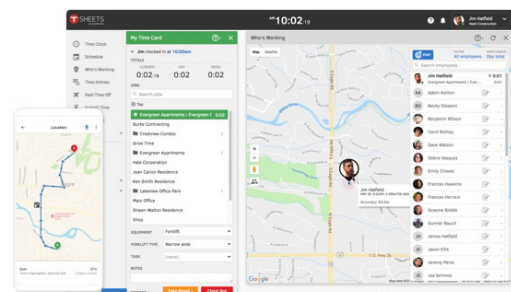

A more human resource.®

Save 6% on payroll costs²

Over half (57%) of manufacturers use physical time clocks, spreadsheets, or paper to track employee time.¹ But these systems can result in costly payroll errors. Say goodbye to unnecessary and error-prone manual data entry by choosing a digital time tracking solution. TSheets syncs with your accounting and payroll software to save you hours and simplify payroll.

Know who's clocked in

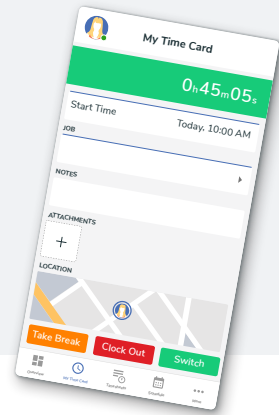

The TSheets "Who's Working" window shows each employee's status in real time, giving manager's greater visibility into who's working and what they're working on. Have multiple employees working the same shift? With the TSheets crew function, managers can clock entire teams in or out at once.

Automated, accurate time tracking

Reduce labor costs and save 6% on payroll²

Introduce your team to TSheets, a simple, accurate time tracking solution that syncs with your accounting or payroll system.

Features you'll love

Time Clock Kiosk

Employees can clock in and out from a single location with a tablet-based time clock. Facial recognition ensures the right employee has punched in.

Scheduling

Create or edit schedules on the fly, and push notifications to your employees when you do. Reduce missed shifts and miscommunications.

Mobile app

Employees can use any mobile device to track time from anywhere, complete with GPS tracking.

Crew functionality

For multiple employees working the same shift, managers and crew bosses can clock entire groups in or out at once.

Customizable fields

Track time for specific jobs, phases, and codes.

Who's Working window

Easily view who's on the clock, how long they've been working, where they're working and what they're working on.

“The ability to switch between divisions for time-keeping purposes brings down the cost of accounting ... No other system can do that as easily.”

- Doug Toy-Smith, Solve-It! Accounting Manager
