

QUICKBOOKS TIME FOR CONSTRUCTION

Time tracking for construction

Accelerate everyday operations with smart timesheets

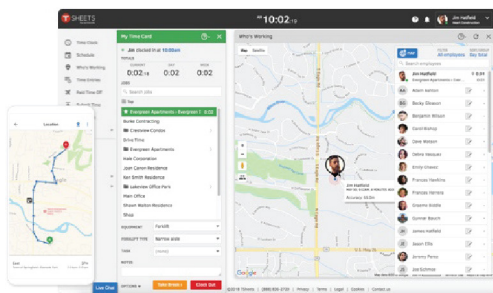

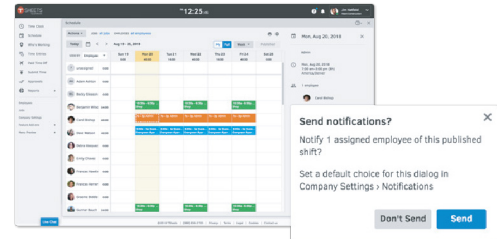

QuickBooks Time

74% of admins manually enter time on physical time clocks, spreadsheets, or paper timesheets, which results in weekly errors that can cost time and money.¹ Logistics can be daunting for contractors with seasonal and mobile employees who work at different locations throughout the day. Illegible or lost employee time cards are often the norm. From scheduling employees to entering employee hours, there's a lot to do each payroll cycle, and manual processes can take hours. QuickBooks Time automated time tracking streamlines payroll, while digital scheduling tools keep your whole crew on the same page.

Schedule with ease

Combined with simple time tracking, online scheduling allows you to create and publish employee schedules and instantly notify employees of important changes. Update schedules from anywhere, using the mobile app.

See who's on the clock

The QuickBooks Time Who's Working window shows each employee's status in real time, giving managers greater visibility into who's working, what time they clocked in, and what they're working on. Employers can make corrections to the schedule accordingly, while employees enjoy greater accountability and efficiency.

Track time by job

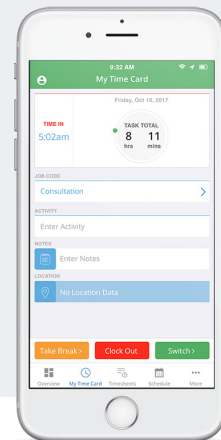

Tracking time against multiple jobs can be frustrating, even for the most organized construction companies. QuickBooks Time offers time tracking complete with job codes, so employees can quickly choose the job they're working on from a drop-down menu each time they punch the clock.

Easy, accurate schedules and timesheets

Reduce labor costs and save 6% on payroll²

Incorporate QuickBooks Time into your construction business systems for simple, accurate scheduling and time tracking. QuickBooks Time even syncs with top-rated accounting systems, to streamline time tracking and payroll.

Features for your business

Mobile Scheduling

Create or edit schedules from any device, and send notifications to your employees to keep them in the loop. Real-time alerts reduce missed shifts and miscommunications.

Mobile GPS

Get a bird's eye view of your crew in real time. See who's on the clock, what they're working on, and where – right from your mobile device.

Crew Clock

Employees can clock in and out from a web dashboard or mobile app. Employers can use any mobile device to manage employee time and schedules.

Biometric Kiosk Time Clock

Employees can clock in and out from a single location with a tablet-optimized time clock. Facial recognition ensures the right employee has punched in at the right job site.

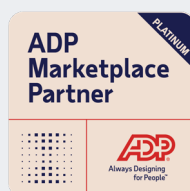

"An amazing tool and very user-friendly. It is exactly what our company needs for a remote/mobile electronic time clock, job tracking, and on-the-fly scheduling reassignments. Thank you for developing such an efficient business asset!"
