

Are you are considering secure cloud-based networking to connect your sites? With SD-WAN (SASE) from Peerless Network, we utilize the latest Secure Access Service Edge (SASE) technology taking distributed software-defined wide area networking, or traditional SD-WAN, to an entirely new level. Our fully managed CPE-based solution delivers simplicity, security, performance, and significant cost savings.

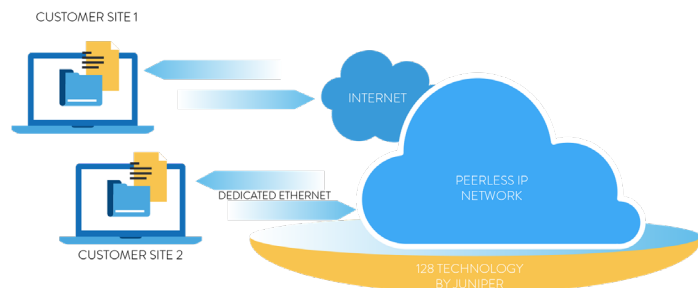

With SD-WAN (SASE) from Peerless, you can easily connect your sites to each other, to Peerless' fully IP-based voice network, key cloud services, and the public Internet. Peerless' easy-to-install feature-rich solution includes private networking, multiple WAN connections at each site, customer-defined apps for each site, and robust traffic prioritization. With Peerless, your entire SD-WAN (SASE) network can be managed via the Peerless Portal putting you in complete control 24x7.

UNMATCHED CAPABILITIES:

- Orchestration & Automation:** Connect applications to your users and manage your networking solution with automated management and intelligent reporting and analytics.
- Zero Trust Security:** Implement deny-by-default architecture to put you in control of session directionality and firewall functions.
- Application-Aware Routing:** Optimize your network with multi-path routing, session classification, and dynamic load balancing.
- Fail Safe Service Delivery:** Maintain connectivity during planned and unplanned downtime with active-active router clustering, sub-second session aware fast-failover, and dynamic session steering.

FEATURES:

- Use your broadband, connectivity, and/or Peerless-provided Ethernet transport connectivity – your choice.
- Choose speeds per SASE node: 10, 20, 100, 200, 500, or 1000 Mbps.
- Private networking.
- Monitor and prioritize traffic (loss, jitter, latency, and packet loss).
- Built-in diversity and redundancy.
- Manage each edge device in real-time.
- Choose pre-defined apps for each edge or create your own apps.
- Rely on Peerless' superior customer experience and flexibility and adaptability to meet your business' unique circumstances.

THE PEERLESS PORTAL

Manage your cloud-based network in real-time via the Peerless Portal. This fully automated online self-provisioning portal allows you to easily purchase, activate in real-time, and manage your SD-WAN (SASE) nodes and entire network via your desktop or mobile device—all in real-time!

A SMART SOLUTION FOR AN EXCELLENT VALUE

SD-WAN (SASE) from Peerless was built on Peerless' rich and proven history of providing reliable communications solutions for our customers at an excellent price point. Using our smart and innovative approach to networking and security will help your business mitigate complex and distributed IT requirements. With SD-WAN (SASE) from Peerless, your network will enjoy secure access no matter where their users, applications, or devices are located.

Are you ready to future-proof your network with Peerless' cutting-edge platform? Call us at **(888) 662-7757** or email us at sales@peerlessnetwork.com.
