MODAS

FL Flex™ 2 EQ - GPS Tracking and Intelligent Equipment Management

Know where your assets are at all times whether you have bulldozers, scrapers, trenchers, cranes, mixers, or some other special equipment. We've got you covered. Increase profitability and protect your assets from misuse or theft, with the FL Flex 2 EQ. This covert GPS tracking device combines with intelligent cloud software, to give you actionable insights. Make smarter business decisions faster with the FL Flex 2 EQ, all while improving profitability and minimizing loss.

FL Flex 2 EQ Benefits:

Proactive asset maintenance

Plan and schedule maintenance based on real engine hours, not just calendar days.

GPS tracking

Know where your assets are at all times to minimize capital loss, mitigate against insurance increases, and keep jobs on time to maintain customer satisfaction.

FL Flex 2 EQ Features

Location history, geofence breach, & alerts for landmark exit / entry

Locate your asset at all times. Never wonder if your equipment is safe at a job site overnight, or if your employees are using your assets for side jobs.

Ignition on/off

Get alerts when your assets are in use. Have peace of mind knowing your assets are only used when authorized.

Engine idle time

Track engine idle time and make adjustments to minimize fuel expenses.

Vehicle battery voltage

View battery voltage when asset ignition is active, to determine if a replacement is needed.

Customizable reporting

Automate reports with the most relevant data.

Utilization and inactivity tools

Assess activity, utilization of assets, and monitor their movement in our cloud based, FleetLocate UI.

10-minute standard status intervals

Get consistent updates when the ignition is active or the equipment is moving. If the equipment is stationary and the ignition is off, you'll get alerts once a day.

Covert installation

Minimize tampering with this covert solution that includes an optional tamper alert sensor.

4G / LTE support

Reliable nationwide coverage
