

# Lumen® Hyper WAN

Purchase your next business network in minutes.

Businesses today require flexible, higher performance network connections that scale to meet critical applications demands.

Lumen® Hyper WAN provides two networks for one monthly service rate with just a click to accept terms. We supply a network platform that is easy to set up, maintain and scale. The online self-service experience lets you design, price and purchase Lumen® Hyper WAN Internet and Lumen® IP VPN for each location in minutes and get your network up and running fast with automated service delivery.

## Streamlined design

One price for bandwidth, network, two included firewalls and building extensions

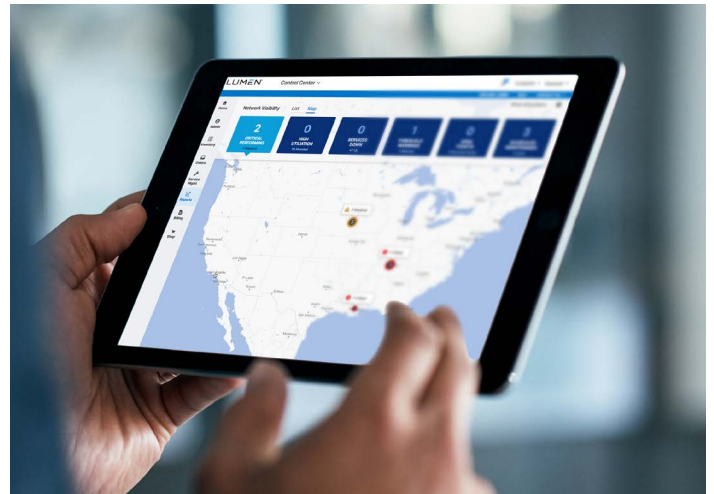

## Digital experience

Self-service design, price, purchase and management within a common online platform

## Flexible additions

Add services and scale bandwidth using the same online experience

“ Depending on your location and service configuration, Lumen® Hyper WAN is designed to provide **up to 80% faster service delivery times.**”

## Common Use Cases

- Business locations that require continual access to high-performing cloud-based applications
- Business locations that frequently access compliant customer information and require consistent availability
- Growing businesses that need to simplify and accelerate the addition of business locations, bandwidth and services

## Features

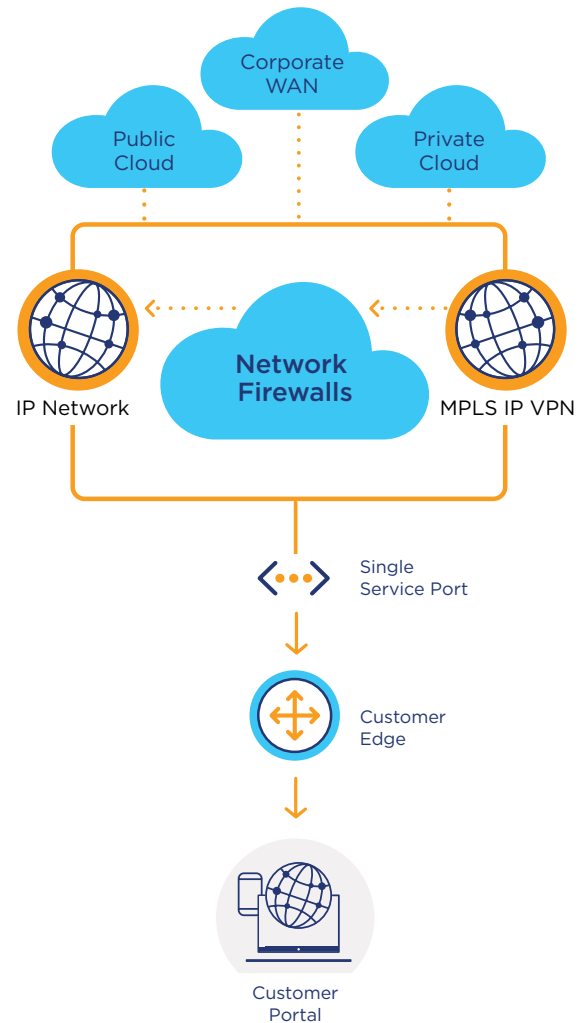

As the digital economy grows, businesses need a network that is easy to add, scale and change using a flexible online experience. Lumen® Hyper WAN is easy to design, price and purchase and makes it easy to connect every location, user and device.
