

Stop Being Surprised By Your Cloud Spend

Take back control of your budget.

Optimizing cloud spend is not a new problem. In fact, for the fifth year in a row, it's the top priority for organizations moving workloads to the cloud*. Why? With workloads spread across multiple teams, multiple clouds and multiple locations, it's incredibly difficult to accurately map total spend. It's even harder to predict future expenditures and optimize them.

With Expedient Cost CTRL, you can see the entirety of your cloud spend, optimize your current workloads, and manage future spend with upfront cost estimates across your clouds.

Features

- Support for dozens of clouds**
 From hyperscalers like AWS, Azure, and GCP to enterprise clouds like Expedient and everything in between, we can connect and analyze costs.
- Budget control with approval workflows**
 Set budgets for spending and prevent out of budget deployments from creating unexpected shortfalls.
- Compare pricing across clouds**
 At time of deployment, see what your sizing will cost in different cloud platforms and know your costs upfront.
- Deep reporting capabilities**
 Show where spending can improve with organization-friendly reports and get real-time insights with filtering and custom tagging.
- Cost visibility with showback**
 Group your organization's usage to gain visibility into your teams' or business units' spending at a granular level.
- Customize your costs**
 Utilize the cloud providers' pricing APIs to pull in instance types from your clouds and apply custom rate cards to personalize your pricing.
- Continuous optimization**
 Constant monitoring and easy implementation of improvements ensures you're not overspending on your instances.

Deploy your cloud workloads with confidence that you're spending wisely.

Expedient Cost CTRL is built to help you centralize and optimize your cloud spending, regardless of what clouds you may be using. With an easy-to-use GUI, you can build reports and leverage customizable analytics to deliver savings back into the business. Connect multiple accounts across your teams and gain visibility across your cloud spending that enables your multi-cloud journey.

Outcomes

Cost Savings

Know that your cloud spend is optimized and find savings in your existing deployments.

Easy-to-use, but Powerful

Use the GUI or API to deliver powerful cost analysis to your organization.

Consistency

A single point of management for all your clouds cuts the time you spend managing them.

Fully Managed

Save the hassle of running and maintaining a platform and focus on optimizing your workloads.

Agility with Control

Enable your developers to deploy anywhere at any time without losing control over spending.

Support

24x7 OSC support. We're here to help you when you need it.

Security and Compliance

HIPAA, HITECH, SOC1, SOC2, SOC3, PCI-DSS, CSA compliant.

Scalability

Start small and grow as you expand your visibility.

Easy Setup and Simple Pricing

Only pay for the tooling you use with a predictable monthly cost.

Expedient offers award-winning cloud solutions and managed services, including best-in-class disaster recovery, security and compliance, and more.

Expedient is the premier Enterprise Cloud Provider nationwide. Our innovative multi-cloud capabilities deliver best-in-class services that offer unprecedented visibility, transparency, and fine-tune control across on-prem, colocation, enterprise, hybrid, and hyperscale cloud platforms.
