MCompliance

Document & Policy Management

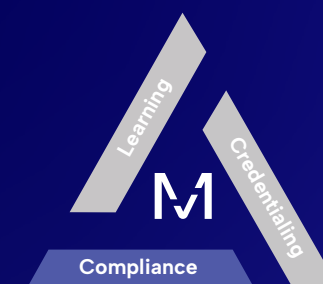

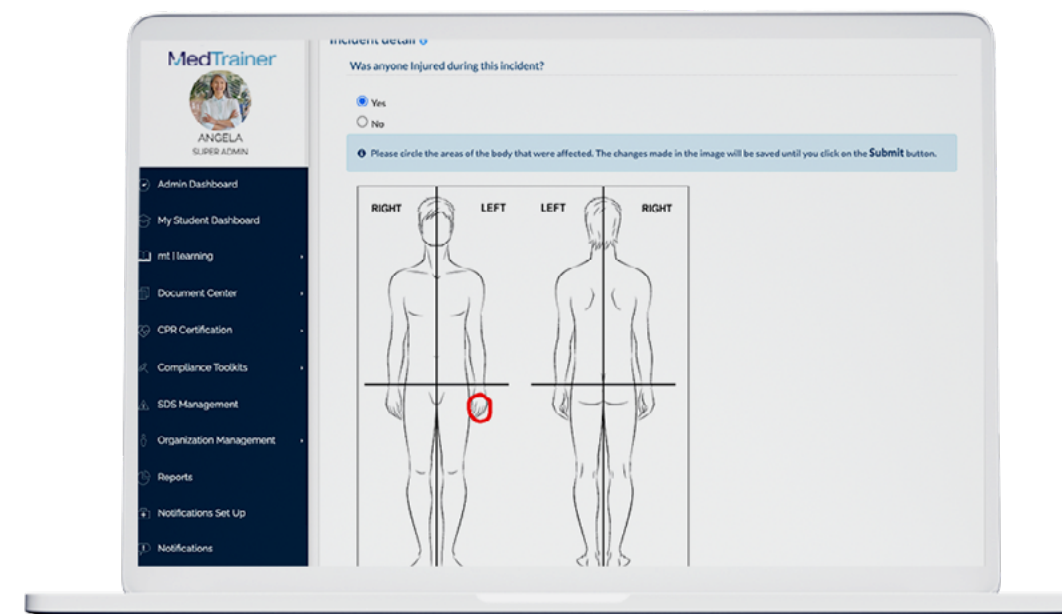

Organize all of your documents and policies in one unified repository accessible from any computer with internet access. Be 100% confident that current versions of any document are acknowledged and accessible by staff. Easily see who has acknowledged new procedures and who hasn't. Collaborate on new documents within the same platform using our policy authoring tool. Get feedback and approval in real-time all in one place.

MCompliance

Incident Reporting

Eliminate paper incident documentation. Create, review, search, and monitor current and past incident reports across your organization's departments and locations. Collect incident data based on your needs and the specific situation. With customizable forms, you can capture every necessary detail. Escalate incident reviews and reporting to the right stakeholders with an automated workflow from any computer. Our secure system routes these reports and ensures they stay confidential.

Upload or create forms using templates

Build automated escalation paths internally

Create environment of care reports

Create, update, and resolve incidents in our system

M Credentialing

Software

MedTrainer Credentialing Software organizes and accelerates your process with all the data you need to make business decisions in one place. From provider data and files to upcoming action dates and automatic reminders, MedTrainer provides a single place to enter, import, and store mandatory provider information based on NCQA guidelines.

Automatic verifications & exclusion checks

Primary source verification workflows

Payer enrollment workflows

Dashboards and highly-customizable reporting

Provider document management

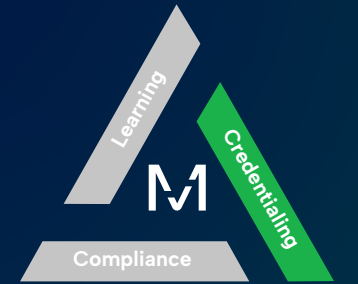

Automated notifications and reminders

M Credentialing

Managed Services

MedTrainer's regionally-focused team of credentialing specialists can take care of all parts of your process including enrollments, primary source verifications, exclusions monitoring, document maintenance, recredentialing, and privileging. In addition to services, you'll have access to MedTrainer Credentialing Software where all actions are tracked, giving you complete visibility without the burden of completing every task.

Proven credentialing workflows

Maintain visibility into the process

Follow-up and continuous monitoring

Credentialing specialists assigned by state

Provider, group, or facility enrollments

External facility privileging

Why MedTrainer?

A Single Platform for Compliance Operations

Our unified technology platform integrates education, documentation, and credentialing, making healthcare compliance streamlined and certain. Through configurable workflows, task automation, digitization, and integrations, MedTrainer helps healthcare organizations stay organized and maintain visibility into complex processes. MedTrainer is a consolidated, data-tight, one-login platform that's one less headache for your compliance team.

Built With a Healthcare Focus

Since day one, MedTrainer has been singularly focused on the healthcare industry. Every course in our library of nearly 1,000 is carefully curated by healthcare compliance experts to meet the unique needs of the industry. MedTrainer's proven credentialing workflows help to accurately and quickly credential thousands of providers annually, and our compliance software is designed to help healthcare organizations easily meet regulatory and accreditation requirements.

Customer Service You Can Count On

MedTrainer is constantly investing in the customer experience. Every call is answered by a member of our team and if we can't solve your issue immediately, we are committed to solving it within two business days. We take customer feature and course topic requests seriously. Every month, additional customer-requested features are implemented as part of our plan for continuous improvement. We are continuing to invest in enterprise-level features, additional credentialing capabilities, and reimagining what's possible in digital compliance.

Award Winning Software

We've partnered with over 2,500 clients, representing over 15,000 healthcare organizations and support 300,000 healthcare professionals.

What Our Customers Are Saying:

"Using MedTrainer helps us focus on other aspects of our clinic by cutting down on time needed for our credentialing"

-Dana Eberhard,
Credentialing/Billing Specialist, FASA Family Wellness, PLLC

★ ★ ★ ★ ★
Rating 4.5/5

"It [used] to take me about 20 minutes to prepare and assign requirements to each new hire. Now, with MedTrainer it takes three minutes at most — and in a busy healthcare practice, every minute counts."

-Joanne Umbrasas,
Director of Operations, Sault Tribe Health Division

★ ★ ★ ★ ★
Rating 4.3/5

"MedTrainer was a good fit for many reasons: more affordable for a small private practice setting; links with McKesson and their SDS library; ease of set up and then use; availability of a wide range of course content and the ability to add custom courses quickly and efficiently (we've added quite a few ourselves)."

-Wendy, Practice Manager,
Urological Associates of Savannah

"MedTrainer is a great resource for any group in the healthcare industry! We are a large medical group with many employees needing to stay current with their CEs, HIPAA, and bloodborne pathogen requirements. MedTrainer is easy to use and offers many different courses required for healthcare professionals. I can assign courses for the staff and automatically assign them to repeat in one year."

-Jamie Utt, Manager of Clinical Services,
Edinger Medical Group
