CROWDSTRIKE

Integration Guide
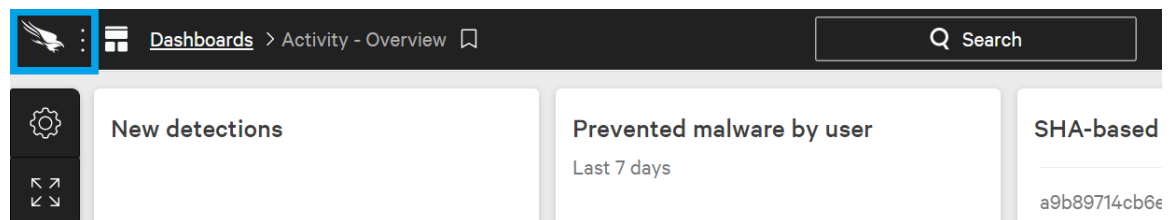

Configuring CrowdStrike:

Architecture:

CrowdStrike Configuration:

The Management server must have access to the following URLs:

- https://falcon.crowdstrike.com
- https://falcon.<tenant-region>.crowdstrike.com/

Go to the CrowdStrike Falcon portal, at https://falcon.crowdstrike.com/, and execute the following steps:
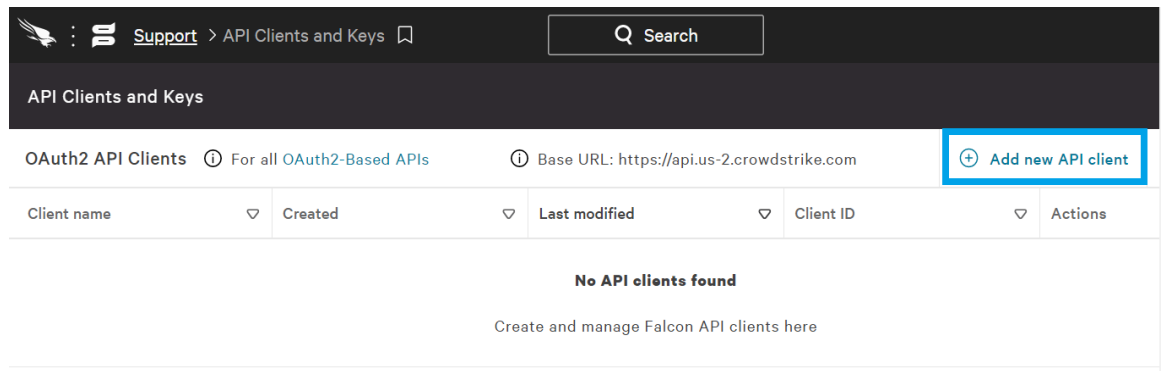

1. Open the **Menu**.

2. Click on **API Clients and Keys**.

a. Add new API client. A dialog will appear.

    i. Fill in the following details:
1. Under **CLIENT_NAME**, type **itsmine_app**.
2. Under **DESCRIPTION**, type:

> This API client allows the integration of CrowdStrike Falcon with the ITsMine platform.

3. Check the **Read** and **Write** permissions for **Hosts**.

    ii. The dialog table should contain the following information:
    iii. Click on **ADD**.
    iv. A new dialog appears, with the **CLIENT_ID**, **SECRET** and **BASE_URL**. Copy those values. We will use them later.

b. The **itsmine_app** is created, and a new table entry is added.

3. Go to ITsMine portal
    a. Paste the **CLIENT_ID**, **SECRET** and **BASE_URL** into the corresponding fields in the CrowdStrike configuration (Under **Connections**).

Connections   CrowdStrike Falcon ▼

☑ Enable

Client id   Client secret

Base Url

Submit

    b. Click on **Submit**.
4. Well done! The configuration is finished successfully. CrowdStrike connection is now set up.
