

Create and manage price lists with **Fortude M3 Price List Manager**

- Are you a fashion manufacturer, struggling to manage multiple price lists with several line items?
- Are manual price updates during product mark ups and mark downs taking your time?
- Is the lack of a unified interface preventing you from effectively managing your price list management workflow?

The Fortude M3 Price List Manager enables fashion manufacturers and retailers to seamlessly create and manage price lists in one unified interface.

The tool allows manufacturers and brands to streamline their price list management workflow and improve visibility and user experience, while boosting overall operational efficiency.

Why Fortude M3 Price List Manager

A unified interface for improved price management experience

Create and maintain customized price lists on a single interface, without switching between multiple M3 programs.

Manage the complexity of customer-based pricing for different markets with ease

Users to search for and filter price lists, by sorting items within a price list by header values and viewing them in a (paginated) window.

Simplify your re-pricing process

In the case of a price mark down for multiple products, the Fortude M3 Price List Manager allows users to mass update all items, instead of manually changing the price for each item.

Easily import and share pricelists

The Fortude M3 Price List Manager allows business users to export and download a price list as a spreadsheet without any line limitations.

10x boost in upload speed with parallel processing

The tool allows users to upload price list items in multiple batches, concurrently via Excel files, which helps significantly reduce the time spent on data uploads.
