

Introducing the Concur Integration with ADP®

Bringing HR and payroll together in one.

Your team's time is valuable – and they can't afford to spend it on tedious, manual tasks. Give their days back to them with the Concur Integration with ADP. Concur Expense data synchronizes with ADP HR data, helping to eliminate manual processes, easily reimburse expenses, and improve user data accuracy.

Two powerful tools in one

By synchronizing your ADP HR and payroll data, you can reduce the time and effort required for Concur Expense user setup and maintenance. You'll effortlessly integrate workflow and approval status.

No more manual tasks

All user data changes made in ADP HR automatically update in SAP Concur. No need to manually import and export data between systems.

Improved data accuracy

Automated data entry provides more reliable information – including better downstream data, reporting, and cost association.

Seamless employee reimbursement

Reimburse out-of-pocket (cash, non-corporate card) expenses simply via ADP payroll. Once expense reports are approved, payment information flows directly from Concur Expense to ADP.
