

Enterprise Platform to Equip Teams & Manage Assets Globally

Firstbase lets you automate the lifecycle of every asset in your business, ensuring the right person has the right equipment at the right time, always. We get equipment to and from employees wherever they are in the world, providing a full history of actions taken on every device.

Manage assets globally

Deliver optimal experiences across the entire employee journey beyond just onboarding. Firstbase is full lifecycle management.

All-in-one logistic solution

Firstbase takes care off all your asset's physical needs including returns, recycling, repairs, replenishment and imaging.

Integrated with your apps

Over 20+ integration with the most common SSO, HRIS and ITSM platforms like Workday, UKG, Okta, or ServiceNow.

Firstbase handles your most common asset lifecycle use cases

Firstbase fuses SaaS automation with a global physical operations engine, so you can turn your employee equipment lifecycle into a competitive business advantage.

Onboarding

Automate & personalized onboarding.

Offboarding

Automatically retrieve 97% of devices.

Reuse

Recover assets & redeploy them. + Sustainability.

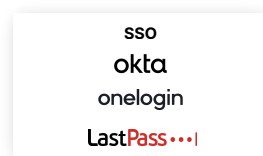

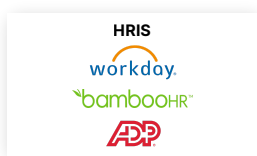

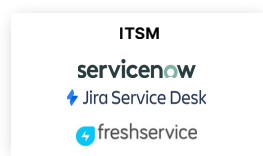

Track

Track of all your assets in one place.

The **Firstbase** Platform provides a flexible, integrated solution that adjusts to your process needs
