# OneSCM® Supply Chain Collaboration
Highly Efficient Procure-to-Pay Management

Competitive Advantage

Connect systems and people together into a collaboration network that allows data and decision-making to flow quickly, seamlessly, and reliably for mid-market competitive advantage.

Highlights

- Faster, more efficient purchase order tracking
- Real-time notifications, alerts, and visibility into changes
- Powerful BI dashboards
- Better communication with trading partners
- Central management (no multi-system login)
- Secure cloud access

Improved Efficiency and Increased Agility

The ability to skillfully move materials and manage trading partners across a multitude of activities, events, time zones, and even continents, is critical to today's supply chain operations. Yet many companies, especially in the mid-market, maintain manual processes and communication practices with trading partners that put them at risk for delays, disruptions, and excessive costs. The information required to keep supply chain operations running smoothly remains out of sync, incomplete and spread across disparate systems. In addition, the cost of delayed responses to issues, unnecessary overpayments, and manual processes rapidly chips away at margin and cash flow. A supply chain management solution with workflow automation and features specifically designed for today's margin-conscious companies can resolve these roadblocks, leading to increased supply chain efficiency and cost savings from PO to payment, and increased agility to address the unexpected and maintain a competitive edge.

Why OneSCM® for Highly Efficient Procure to Pay Management

OneSCM creates a truly connected supply chain that links you with your trading partners as well as your customers for seamless, highly efficient operations from procurement to finished goods to trading partner payments. Suppliers, logistics providers, contract manufacturers, and even your customer's back office systems are quickly and easily integrated with the OneSCM collaboration platform, giving all parties real time visibility, access, and most importantly, the ability to quickly respond to deadlines, instructions, shipments and changes. Procurement can place orders with higher confidence. Operations can more accurately plan lead times and resources for finished goods. Sales can commit to customer requests and delivery times. Finance can more accurately project accounts payable demands. The OneSCM collaboration console allows planning, procurement, logistics/shipping, AP, and other supply chain executives to stay in step with external suppliers — either at the desktop or via mobile devices. OneSCM's contemporary user interface consolidates all documents related to a specific transaction into a single location for quick reference, and business intelligence dashboards gather relevant data into easy-to-read charts and graphs to make the supply chain easier to manage. All of this is delivered through a monthly cloud-based SaaS, configurable, modular software and ongoing support for both internal and external users, making the overall total cost of ownership lower than expected.

SUPPLY CHAIN

Integration, Scalability, Visibility

OneSCM's system-agnostic integration allows any number of back office systems to be connected together for a "single view" of supply chain operations. The flexible and scalable automated workflows can be implemented to fit current business process and cost-effectively modified as the business and requirements mature. Smart mobile devices can be leveraged for remote transactions and communication — delivering increased visibility and control from virtually any location. OneSCM also offers powerful business intelligence (BI) dashboards for performance monitoring and trading partner management.

OneSCM connects systems and people together into a collaboration network that allows data and decision-making to flow quickly, seamlessly, and reliably. Integration with back office systems is streamlined and more activities can be automated through a powerful and configurable workflow engine.

BUYER   **SUPPLIER**

OneSCM

Secure and centralized collaboration

Via monthly subscription SaaS or private cloud, or on-premise, the OneSCM supply chain management solution is available in a variety of options. Trading partner systems can be connected into your management console for seamless acknowledgements, order status updates, delivery notifications and invoicing.

End-to-end supply chain efficiency

OneSCM is powered by a leading workflow management system that can be easily tailored to your specific business processes. It also grows with you, so as you change or scale, approval requirements, approvers, and other notifications can be modified quickly. With OneSCM, everyone stays on the same page (internal staff and external trading partners) so business flows smoothly and potential issues can be proactively addressed.
