

Your AI Is Only as Smart as Your Data Foundation

42%

of enterprise AI projects have been delayed or failed due to data readiness issues

Fivetran/Redpoint AI & Data Readiness Survey, 2025

HOW IT WORKS

3 FOUNDATIONS AI REQUIRES

Automated Data Movement

Pipelines that eliminate manual wrangling and keep data fresh across every source system.

Governed Data Lakehouse

One platform with consistent business logic, full lineage, and role-based access controls.

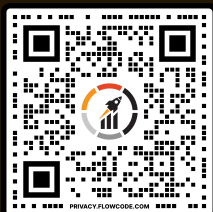

Enterprise Semantic Layer

Standardized definitions so every team and every model works from the same trusted numbers.

PICK YOUR STARTING POINT

GUIDE

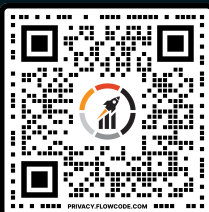

The AI Readiness Playbook

The research behind why AI projects fail and a practical framework for fixing the data foundation

ASSESSMENT

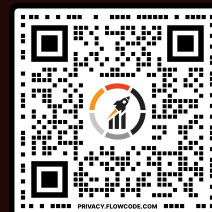

The AI Readiness Assessment

Find out where your organization stands with 20 questions across 5 dimensions of data maturity.
